Notes	191

Away from the crowds, that's where you'll find us.  
Alone with our thoughts, our equipment and our  
riding buddies. The purest form of skiing.

Where some see the edge of the resort,  
we see infinite possibilities. Following our  
hearts and mastering our craft.

The drive is our own but the experiences are  
best shared, tall tales in the bar from deep days  
in the backcountry.

Learning new skills or hucking new cliffs, making  
the most of that next day on the hill is what we all  
aspire to, a perspective that we all share.

More of a community than a sport, progression  
bonds us tightly. Some push the limits of what's  
possible, while others discover their own,  
step by step, turn by turn.

We may all choose different lines,  
but we are all searching for the same thing.

**KORE**

**OUR LIGHTEST  
FREERIDE SKI, LIGHTER.**

KORE HAS EVOLVED. THE TECHNICALLY SOPHISTICATED FREERIDE SKI HAS BEEN REFINED. THE SAME KORE PERFORMANCE AND TECHNOLOGIES, IN A LIGHTER MORE ACCESSIBLE PACKAGE. LESS SKI, FEWER RESTRICTIONS, MORE SKIING.

**WE CREATE, YOU RIDE.**

#TOTHEKORE

**WE CREATE, YOU RIDE.**

This season, it's time to bust the lines and break the mold. Let's explore the backcountry and discover the whole mountain. Our research and development is constantly innovating all our products. That's why you can have complete trust in our equipment to be there for you, when you need it.

Drop in to the 21/22 Freeski collection.

# KORE

#TOTHEKORE

## OUR LIGHTEST FREERIDE SKI, LIGHTER.

We stripped back what wasn't needed, further refined our products and left only the essentials. With less weight to hold you back, you can focus entirely on one thing: The skiing.

### LIGHTNESS

Comes from the revolutionary construction, a unique top sheet, running the length of the blade, resulting in the lightest ski in its category.

### FLOTATION

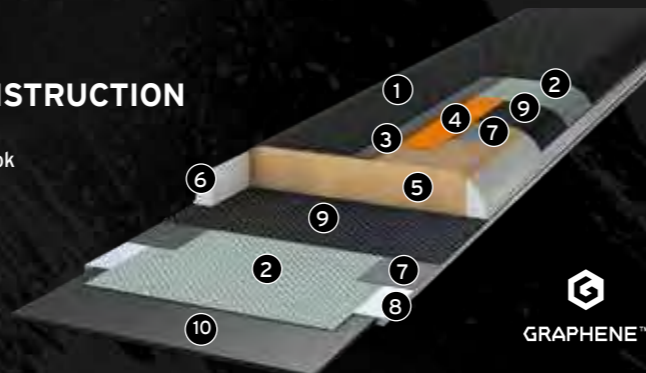

The Graphene fused tip and tail reduces and redistributes the weight throughout the ski. The thinner profile enhances flotation in soft snow and maximises manoeuvrability.

### CONTROL

The additional Carbon layers gives the skier precise control in variable terrain, providing strong torsional stiffness and great stability.

### MULTILAYER CARBON SANDWICH CAP CONSTRUCTION

- ① Polyester Fleece
- ② Glass Fiber
- ③ Glass Fiber bk
- ④ Graphene
- ⑤ Karuba-Poplar Wood Core
- ⑥ Sidewall
- ⑦ Dampening Layer
- ⑧ Edge
- ⑨ Carbon
- ⑩ Base

GRAPHENE™

**Graphene:** Graphene is the strongest, lightest material known to man. We fuse it into the KORE's tip and tail to make it lighter and more responsive in deep snow.

GRAPHENE™

**Karuba:** The Karuba/poplar wood core is what gives the ski its pop and personality. It's the perfect ratio of density and weight. The advantages of combining karuba, Poplar, and Graphene enhance the ski, making it light and balanced.

K

## THE FREESKI LINE

	KORE 111		KORE 97 W
	KORE 105		KORE 91 W
	KORE 99		KORE 85 W
	KORE 93		
	KORE 87		

## NEW FEATURES

### DIFFERENT CONSTRUCTIONS FOR DIFFERENT CONDITIONS

We have created two different constructions within one line: A stiffer, more robust construction for the narrower skis. And a softer, more playful feel on the wider skis.

### NEW SIZING

We have reduced the gap between sizes by 22%, allowing skiers to hone in their desired blend of stability versus playfulness.

### FEEL-FOCUSED

New constructions and new sizes allow skiers to dial in their ideal feel.

### PROGRESSIVE CHAMFER

A crud-cutting chamfered top edge also improves durability for each model. Additionally, more chamfer = a more playful feel.

**KORE 117**

The KORE 117 can fuel your faceshots down any mountain.

**ARTICLE NUMBER**

# OBLIVION

## LIMITLESS PROGRESSION!

Let's go shred, anywhere and everywhere. Where we want, how we want. Break the confines of the park and take freestyle to the whole mountain. Let's throw the old limits to oblivion

## THE FREESTYLE LINE

Evolved from HEAD's legendary CADDY line, the OBLIVION name has been revived. The beefed up park ski is the weapon of choice for creative riders looking to push themselves all over the mountain.

OBLIVION 94

OBLIVION 84

OBLIVION 79

## FREESKI

### OBLIVION 94

The wide twintip Oblivion 94 puts the „free“ in freeride.

### OBLIVION 84

Easy to handle, the Oblivion 84 is the perfect match for creative skiers.

### OBLIVION 79

The Oblivion 79 is a freestyle-focused ski for the whole mountain.

## FREESKI

# GOOD VIBES

## THE WORLD'S ONLY ELECTRONIC SKI DAMPENING SYSTEM

EMC - ENERGY MANAGEMENT CIRCUIT  
REDUCING NEGATIVE VIBRATIONS SO YOU CAN FULLY TRUST  
THE SKI AND FOCUS ONLY ON YOUR OWN PERFORMANCE

**HEAD**  
.COM

## GOOD VIBES ONLY

YOU CAN TRUST EMC TO DELIVER SMOOTH SKIING  
AND EXCEPTIONAL EDGE GRIP, WHATEVER THE CONDITIONS.  
WHEN THE SKI BENDS AND VIBRATES, IT TAKES THE  
KINETIC ENERGY IN THE SKI AND TRANSFERS IT INTO  
ELECTRICAL ENERGY, WHICH IS THEN USED TO ABSORB  
NEGATIVE VIBRATIONS FOR A SMOOTHER,  
MORE STABLE EXPERIENCE.

# WORLD CUP REBELS

## WHY E-RACE?

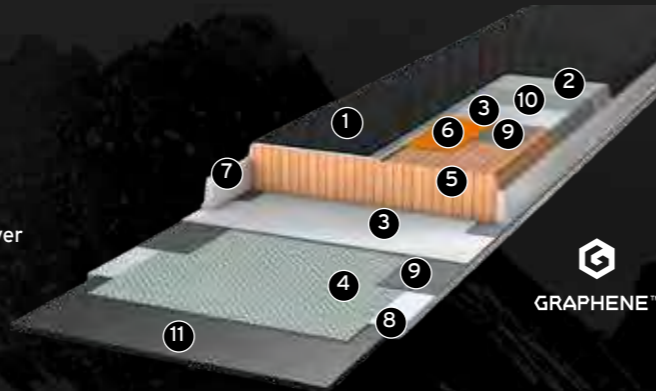

Because, if you race, you know there's no such thing as fast enough. These are the tools for those who need speed. A hundredth of a second is small but it's still the difference between winning and losing. That's why you need equipment that delivers critical levels of performance putting you where you belong - out on front. The dedicated racer now has the perfect all-day race ski.

## PERFORMS BECAUSE IT'S BUILT TO

Developed with space-age materials, the Graphene WC Sandwich Cap Construction is a superb balance of super-light Graphene and extra titanal layers to give extreme agility and outstanding responsiveness for the ultimate racing performance.

### WC SANDWICH CAP CONSTRUCTION

- ① Top Sheet      ② Glass Fiber fleece    ③ Titanal Layer
- ④ Glass Fiber    ⑤ Wood Core            ⑥ Graphene
- ⑦ Sidewall       ⑧ Edge                    ⑨ Dampening Layer
- ⑩ Reinforce Glass Fiber    ⑪ Base

## FAST, FASTER, FASTEST.

This year our hero range is race. Every product in this range is designed, constructed and finely tuned to do one thing - put you on the podium. Performance is built into every layer and every part of each ski. They are all tuned to a different style of skiing, but they all have one thing in common - flat out fun.

## TRICKLE DOWN TECH

It starts with our top of the range products but it doesn't stop there. Whatever we put into the best we make, ultimately finds it's way into everything we make. We don't just want our premium products to perform superbly, we want superb performance to be a part of everything we do, no matter where it is in our product range.

# SUPERSHAPE

## THE SUPERSHAPE EVOLUTION

Introducing the ski for those who were raised on skis. You may not want the pure racer but you do want the feeling of a well made, high-performance, race orientated ski. You want a ski that is inline with your abilities, whether you bomb down the slopes from dawn till dusk - or you want to arc some nice carving turns into the snow. This is the ski you can trust. This is the Supershape revolution.

### WC SANDWICH CAP CONSTRUCTION

- ① Top Sheet      ② Glass Fiber fleece      ③ Titanal Layer
- ④ Glass Fiber      ⑤ Wood Core      ⑥ Graphene
- ⑦ Sidewall      ⑧ Edge      ⑨ Dampening Layer
- ⑩ Reinforce Glass Fiber      ⑪ Base

### EFFORTLESS POWER

These skis have a core construction with a much larger woodcore. Due to the lightweight properties of Graphene, we are able to use a thicker and wider aluminium sheet, which covers the entirety of the ski, ensuring a more reactive and powerful ride.

### BALANCE

With Graphene positioned in the center of the ski we have been able to reduce the thickness of the center and shift more material to the tip and tail, allowing for a ski with a truly harmonized flex distribution, easier engagement and quicker edge-to-edge changes.

### CONTROL

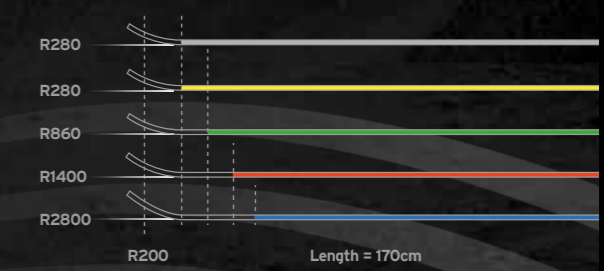

Thanks to a thicker tip and tail it has been possible to design specific geometries for the five different shovels. Due to immediate effective edge, the ski is constantly in contact with the terrain no matter the severity.

## A POWERFUL COMBINATION

Every product in this range is designed and constructed around power, balance, control and stability. Add the world's only electronic ski dampening system and you end up with something you can really trust. EMC is our Energy Management Circuit which reduces negative vibrations and delivers smooth skiing and exceptional edge grip, whatever the conditions.

- SUPERSHAPE e-ORIGINAL
- SUPERSHAPE e-SPEED
- SUPERSHAPE e-MAGNUM
- SUPERSHAPE e-RALLY
- SUPERSHAPE e-TITAN

### SHOVEL ILLUSTRATIONS

A smaller shovel radius means the front contact area of the ski moves forward and engages faster into a turn.

**SUPERSHAPE E-ORIGINAL**

Carve away with the one that started the Supershape ski family success story.

**SUPERSHAPE E-SPEED**

Want to race like hell and still make agile turns? Take the e-Speed and go.

**SUPERSHAPE E-MAGNUM**

Fun for on and even off the piste: the e-Magnum takes care of you.

**SUPERSHAPE E-RALLY**

On-piste, off-piste, your choice thanks to the Supershape e-Rally.

**SUPERSHAPE E-TITAN**

Slushy has never been more fun than with the e-Titan.

# V-SHAPE

## EFFORTLESS POWER AND CONTROL

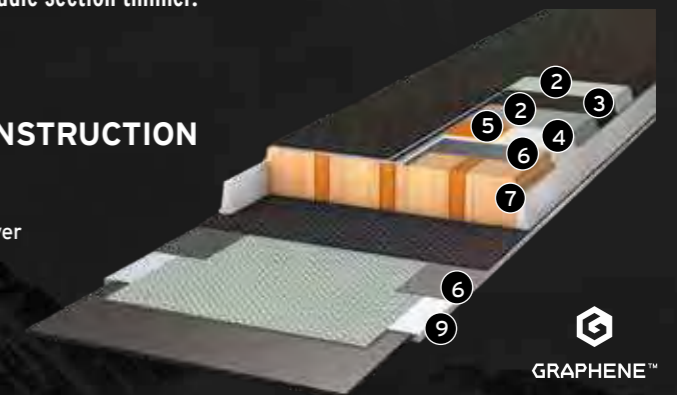

There are limits to what you can do on a conventional ski. But, the new V-Shape is anything but conventional. It's all about the taper ratio. A bigger taper lets the ski work with minimal power, so the ski is much easier to turn and much more responsive and supportive. A smaller taper ratio requires more power but this makes turns more precise and gives even greater stability. The V-Shape takes a good skier and makes them even better.

## THE V-SHAPE PHILOSOPHY

HEAD has developed a ski line using Graphene combined with a super-lightweight carbon and karuba wood core, fully embedded throughout the length of the ski. This increases the strength and durability of the ski whilst making it lighter. Unique weight distribution balance has been created by making the tip and tail thicker and the middle section thinner.

### SUPERLIGHT CARBON SANDWICH CAP CONSTRUCTION

- ① Top Sheet
- ② Glass Fiber
- ③ Carbon
- ④ Diagonal Glass Fiber
- ⑤ Graphene
- ⑥ Dampening Layer
- ⑦ Woodcore Karuba-Ash
- ⑧ Sidewall
- ⑨ Edge
- ⑩ Base

**Graphene:** Integrating Graphene into the construction has two essential benefits: a reduction in weight and an increase in performance.

**Karuba:** Utilizing karuba wood in the core gives you the perfect balance of density, durability, and weight.

**ERA 3.0** is a combination of technologies, shape and geometry in order to achieve effortless handling, more control and instant grip.

## FIND YOUR V-SHAPE

Each V-Shape LYT ski gives you effortless control for better steering and increased carvability, thanks to its distinctive taper. You get instant grip on snow, more stability and better vibration dampening control. Carving turns have never seemed so straight forward.

- V-SHAPE V10
- V-SHAPE V8
- V-SHAPE V6
- V-SHAPE V4 XL
- V-SHAPE V4
- V-SHAPE V2

**V-SHAPE V10**

On the slopes the V-Shape V10 is the ski for skilled riders.

# JOY

## ALL ABOUT INNER AMBITIONS

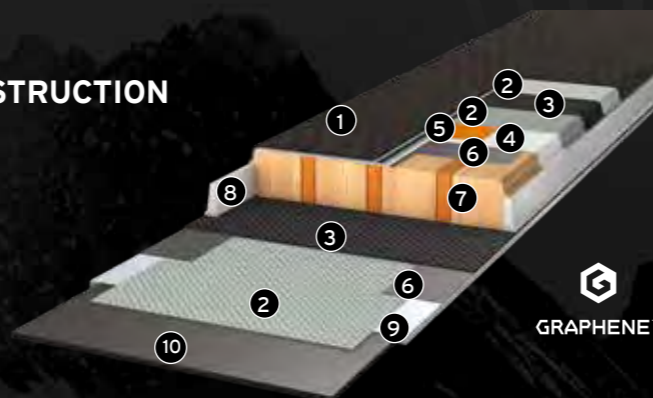

With technology and performance straight from a race pedigree, introducing the new Joy line women's models. Each ski in the range has been individually designed for maximum versatility, meeting a range of abilities from beginner to the expert, both on and off-piste terrain.

## PERFORMS BECAUSE IT'S BUILT TO

Developed with space-age materials, the Superlite Carbon Sandwich Cap Construction is a superb balance of super-light Graphene and extra carbon layers to give extreme agility and outstanding responsiveness for the ultimate racing performance.

### SUPERLITE CARBON SANDWICH CAP CONSTRUCTION

- ① Top Sheet
- ② Glass Fiber
- ③ Carbon
- ④ Diagonal Glass Fiber
- ⑤ Graphene
- ⑥ Dampening
- ⑦ Woodcore Karuba-Ash
- ⑧ Sidewall
- ⑨ Edge
- ⑩ Base

## THE EVOLUTION OF JOY

Designed specifically for female skiers, the Joy range has been further refined to provide improved performance, on and off piste. There's balance, thanks to Graphene weight distribution. A thicker tip and tail design gives perfect, predictable flex while HEAD's signature female specific camber and ERA 3.0 rocker, radius and rebound supply control across all terrain and conditions. The race inspired Power Joy contains EMC, the world's only electronic ski dampening system, a high performance ski for strong female skiers.

WOMEN

### POWER JOY

The perfect racing machine for powerful women.

# E4SY KIDS SYSTEM

## LESS EFFORT, MORE FUN

The new Junior Rail System makes skiing super easy thanks to the low weight and the smoother flex. The new shape of the sole lug and softer brakes allow the kids to step in and out of the binding within seconds and without any help. Compatibility with all ski boot types (A/C/GW A/GW C) completes the new system.

**E4SY**  
STEP IN

New shape of the sole lug - easier to position the ski boot correctly in the binding

Softer brake - less resistance when stepping down (entry force -15%)

**E4SY**  
FLEX HANDLING  
WEIGHT STEP IN

**E4SY**  
HANDLING

Heel can be adjusted in open position

**E4SY**  
FLEX

Locking elements & adjustment levers made from synthetic material

**E4SY**  
WEIGHT

15% weight reduction ski + binding

## THE NEW STANDARD FOR KIDS' SKIING EQUIPMENT

Start them early, and start them often. With a high quality construction, kids will learn faster and ski longer than ever before. The Supershape TEAM is an on-piste ski for children who can already ski. It delivers good stability and helps the kids race up the learning curve.

**E4SY**  
FLEX

Easier to bend

**E4SY**  
WEIGHT

15% weight reduction ski + binding

**WORLD CUP I.RACE TEAM JRS**

This ain't no toy ski. With a full wood core and sidewalls, young speedsters will be stable and quick as they race all over the mountain.

# SKI CONSTRUCTIONS | GRAPHENE CORES

## SUPERLITE CARBON SANDWICH CAP CONSTRUCTION

By combining the lightest and strongest materials, we have been able to develop a more stable, robust and light weight ski. Utilizing karuba wood, carbon, and Graphene materials guarantees optimal performance with the lightest possible weight. The Carbon Sandwich Cap Construction guarantees the ultimate skiing pleasure.

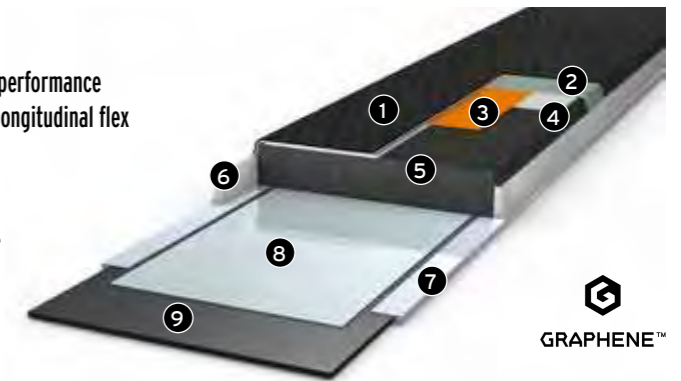

- ① Top Sheet      ② Glass Fiber      ③ Carbon
- ④ Diagonal Glass Fiber      ⑤ Graphene      ⑥ Dampening Layer
- ⑦ Woodcore Karuba-Ash      ⑧ Sidewall      ⑨ Edge
- ⑩ Base

## POWER SIDEWALL TI JACKET CONSTRUCTION

The titanal layer in combination with Graphene, creates a solid and responsive performance ski. The synthetic injected core supported with ABS sidewalls allows for a soft longitudinal flex coupled with super responsive torsional flex, thanks to the sidewall jacket.

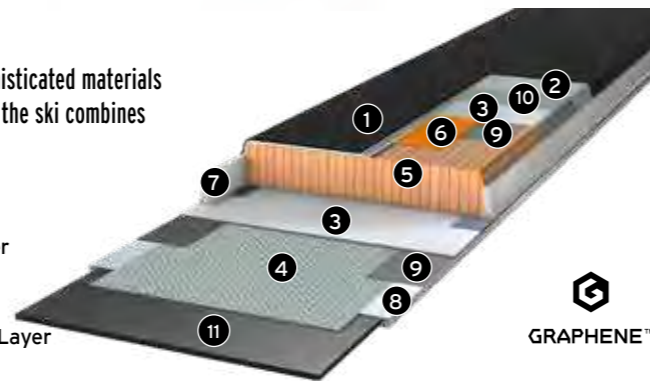

- ① Top Sheet      ② Glass Fiber      ③ Graphene
- ④ Diagonal Glass Fibers      ⑤ Synthetic Core      ⑥ Sidewall
- ⑦ Edge      ⑧ Titanal      ⑨ Base

## WC SANDWICH CAP CONSTRUCTION

The Graphene WC Sandwich Cap Construction, is developed with the most sophisticated materials known to man. With a balanced mix of light Graphene and extra titanal layers, the ski combines the most extreme agility with extreme responsiveness, ultimate performance.

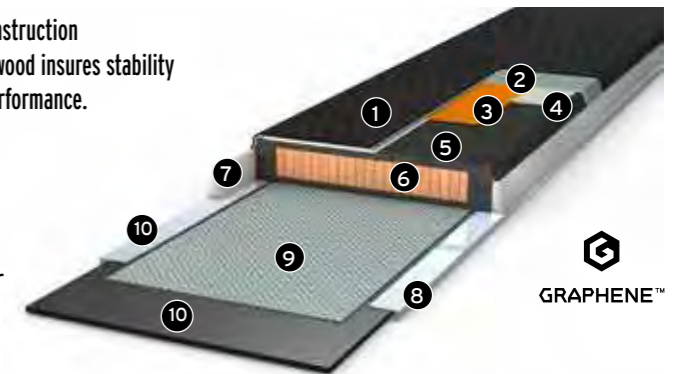

- ① Top Sheet      ② Glass Fiber Fleece      ③ Titanal Layer
- ④ Glass Fiber      ⑤ Wood Core      ⑥ Graphene
- ⑦ Sidewall      ⑧ Edge      ⑨ Dampening Layer
- ⑩ Reinforced Glass Fiber      ⑪ Base

## SUPERLITE POWER SIDEWALL JACKET WOOD COMPOSITE CORE

A vertically laminated wood core with a PU injected sock around it. The cap construction with ABS Sidewalls insures complete protection from mechanical damage. The wood insures stability against vibrations and a smooth ride for target groups looking for ambitious performance.

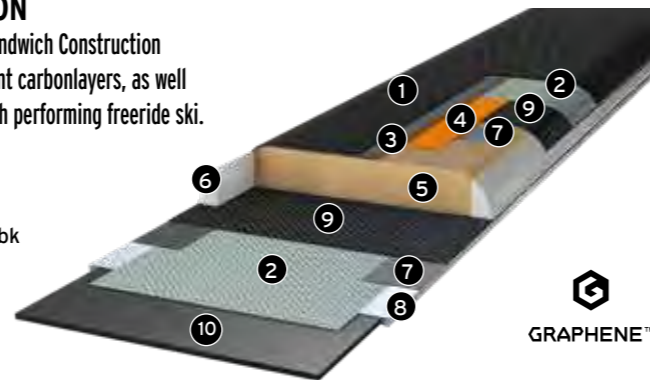

- ① Top Sheet      ② Glass Fiber      ③ Graphene
- ④ Diagonal Glass Fiber      ⑤ Synthetic Core      ⑥ Wood Core
- ⑦ Sidewall      ⑧ Edge      ⑨ Reinforced Glass Fiber
- ⑩ Base

## MULTILAYER CARBON SANDWICH CAP CONSTRUCTION

Developed from the most sophisticated materials known to man: the Super Light Sandwich Construction makes up one of the world's lightest freeride skis by utilizing Graphene, two different carbon layers, as well as replacing the surface with a polyester fleece. The ultimate construction for a high performing freeride ski.

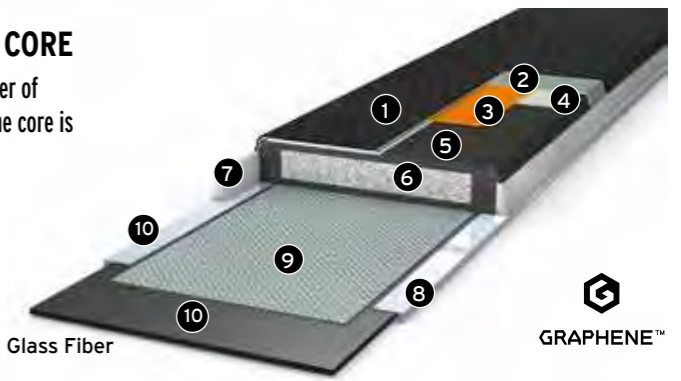

- ① Polyester Fleece      ② Glass Fiber      ③ Glass Fiber bk
- ④ Graphene      ⑤ Karuba-Poplar Wood Core      ⑥ Sidewall
- ⑦ Dampening Layer      ⑧ Edge      ⑨ Carbon
- ⑩ Base

## SUPERLITE POWER SIDEWALL JACKET COMPOSITE CORE

To reduce weight, the interior has been replaced by a lighter material and a layer of Graphene has been inserted enhance performance as the overall thickness of the core is reduced, making it a composite that is easy and forgiving, but always precise.

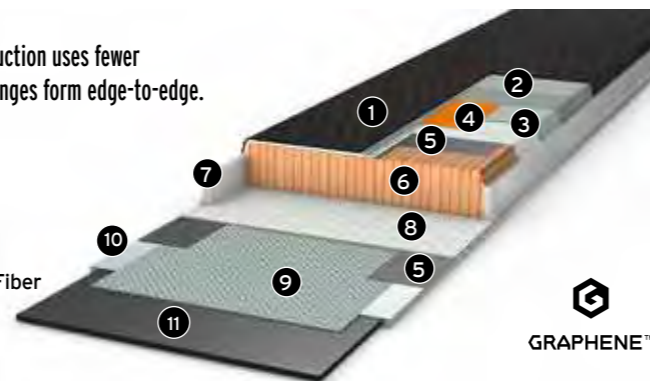

- ① Top Sheet      ② Glass Fiber      ③ Graphene
- ④ Diagonal Glass Fiber      ⑤ Synthetic Core      ⑥ Lite Core
- ⑦ Sidewall      ⑧ Edge      ⑨ Reinforced Glass Fiber
- ⑩ Base

## SUPERLITE SANDWICH CAP CONSTRUCTION

Thanks to the unique properties of Graphene, the Superlite Sandwich Cap Construction uses fewer materials but increases its responsiveness, allowing faster and more precise changes form edge-to-edge. The ultimate ski for flotation and responsiveness.

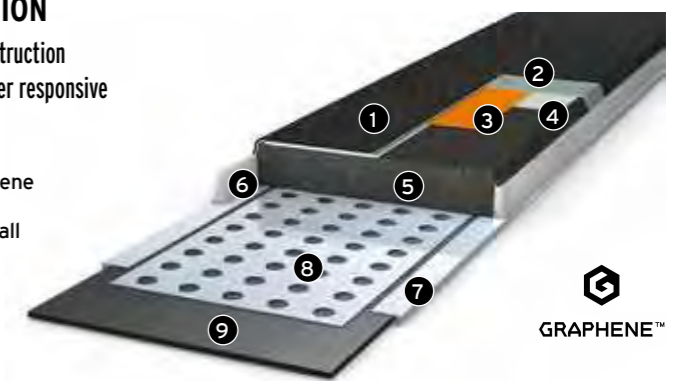

- ① Top Sheet      ② Glass Fiber Fleece      ③ Glass Fiber
- ④ Graphene      ⑤ Dampening Layer      ⑥ Wood Core
- ⑦ Sidewall      ⑧ Diagonal Glass Fiber      ⑨ Reinforced Glass Fiber
- ⑩ Edge      ⑪ Base

## SUPERLITE POWER SIDEWALL JACKET CONSTRUCTION

A synthetic injected core supported with ABS sidewalls. This is a superlite construction thanks to Graphene which allows for a soft longitudinal flex coupled with a super responsive torsional flex, thanks to the sidewall jacket.

- ① Top Sheet      ② Glass Fiber      ③ Graphene
- ④ Diagonal Glass Fiber      ⑤ Synthetic Core      ⑥ Sidewall
- ⑦ Edge      ⑧ Perforated Steel Layer      ⑨ Base

# THE NEW SKI BOOTS FOR SEASON 21/22

RAPTOR WCR 140S

FORMULA RS 130

FORMULA 130

# FIT DONE RIGHT

The most versatile, comfortable, and top-performing boot fit system we've ever sold. 100% Flexible. 100% Comfort. 100% Performance.

# FAST AND EASY CUSTOMIZATION

The Liquid Fit material provides the most precise and the quickest customisation. The material's density ensures the perfect mold in the most critical area of the boot, the ankle and heel pocket. The performance and precision of a foam injection liner in 10 easy, comfortable minutes.

**100% FLEXIBLE:** If necessary, you can add or remove material any time.

**100% COMFORTABLE:** The incompressible material provides the most comfortable customization possible.

**100% PERFORMANCE:** Thanks to superior heel retention.

# FORM FIT

The formfit plastics formulas hold stretches better than ever before for a perfect fit with improved balance and control.

# PERFECT FIT 3D

Perfect fit is the revolutionary customisation system that ensures comfort and performance in HEAD's superb ski boots.

The 3d pre-shaped construction provides optimal adaption to the foot shape while ensuring maximum comfort.

## NEW FORMULA DERIVED FROM RAPTOR WCR

### 2 LASTS: 98MM AND 100MM

Exceptional ski control and precision for expert skiers together with unbeatable comfort and foot wrapping.

# ELITE PERFORMANCE, PRECISION FOR ALL.

WAVE GOODBYE TO COMPROMISE WITH THE NEW FORMULA BOOT. ALL-DAY COMFORT THANKS TO LIQUID FIT AND FULL CUSTOMISATION, COUPLED WITH RACE-DERIVED PERFORMANCE, WILL TEMPT THE RACER OUT OF ANYONE.

#WHATSYOURLIMIT

**HEAD**  
.COM

#### NEW CUFF ALIGNMENT

Provides more precise adjustment, more stable connection and less friction between shell and cuff.

#### SPINEFLEX BUCKLE

Unique buckle concept with a flexible element and constant closure point.

#### EXTENDED TOE BOX

The longer toe box has been designed to reduce torsion and increase power transmission. The new design allows for better balance, increased comfort and warmth for the skiers toes.

#### LIQUID FIT

Customizable for secure ankle hold precise fit.

#### NEW PU MATERIAL

The new PU material, which derives from the experience with the Raptor WCR, provide a more progressive flex, smooth rebound and less vibration for better control.

RAPTOR WCR

# WORLD CUP PERFORMANCE MEETS WORLD CLASS FIT

WHETHER ON A RACE COURSE OR WHEN FITTING BOOTS, MILLIMETRES MATTER. HEAD'S PRECISELY CONSTRUCTED RAPTOR WCR BOOTS NOT ONLY CONQUER ANY TYPE OF FOOT, WITH LIQUID FIT, THEY EVEN COMFORT THE TRICKIEST OF FEET.

#WHATSYOURLIMIT

**HEAD**  
.COM

**CUFF ALIGNMENT**  
Provides more precise adjustment, more stable connection and less friction between shell and cuff.

**NEW WCR BOOT BOARD**  
The all-new WCR boot board has no varus, which allows for rapid and easy fitting.

**NEW BUCKLE POSITIONING**  
The higher screw racing buckle and compact shell don't touch the snow when achieving high edge angles.

**EXTENDED TOE BOX AND MATERIAL**  
The longer toe box has been designed to reduce torsion and increase power transmission. Combined with new PU material, provide a more progressive flex, smooth rebound and less vibration for better control.

**RACE BALANCE**  
Ramp angle: 4°  
Forward lean (new): 9°  
Forward lean (classic): 16°

**LIQUID FIT**  
Precise heel and ankle retention for higher level of performance.

**ADJUSTABLE TONGUE**  
Position the tongue for a perfect personalized fit

# KORE

## THE BACKCOUNTRY BOOT PACKED WITH ADVANCED TECHNOLOGY

The KORE series of boots have been designed with innovative features to deliver exceptional freeskiing performance in a lightweight package. Equally at home ascending in the skin track as it is charging steep descents.

### SUPERLEGGERA BUCKLES

The new light buckles: 90% aluminum, simple, effective and reliable

### NEW POWER PLATE AND VELCRO 50MM

Designed to increase support through the upper cuff, adding a higher level of performance

### BUCKLE LOCK

Lock the buckle's bail in place for a secure fit while ascending

### SKI-HIKE MECHANISM

45° Range of motion: provides strong, precise connection between upper and lower boot

### LOW TECH INSERT

Dynafit certified

FREESKI

# LYT TECH

## WHY LYT TECH WILL SET YOU FREE

You simply begin a process of taking away what is not needed and refining what is left. When you take away weight and complexity you free yourself to do something remarkable. You've distilled something down to it's purest form. LYT Tech is the technology that makes sure nothing comes between you and superb performance.

## WHAT IS LYT TECH?

LYT Tech is a new, modern design concept. The first boots featuring Graphene and Smart Frame Shell design. Optimizing the performance of thin, lightweight shells.

### Smart Frame Shell

The lightweight shell construction is designed for more dynamic responsiveness, improving the performance for the all mountain skier.

### Graphene

The Graphene infused plastic combines with the Smart Frame shell for the perfect balance of performance and comfort in a lightweight boot.

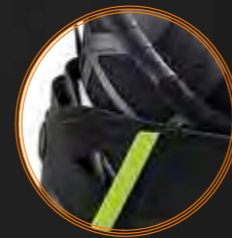

## POWER EFFICIENT DESIGN

Better skiing with less effort. Graphene and Smart Frame Shell combine to give an unrivalled skiing experience that is as powerful as it is lightweight. Easy Entry design and pliable materials make this one of our most accessible boots to date. But, make no mistake, this is a high-performance boot that will satisfy the most advanced skier.

The Nexo LYT is built for skiers who love to cruise carve and charge all day long.

### LIQUID FIT LINER

The revolutionary system that ensures comfortable, performance-orientated customisation

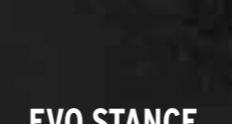

### SUPERLEGGERA BUCKLES

The new light buckles: 90% aluminum, simple, effective and reliable.

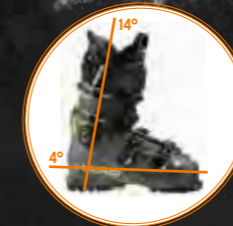

### DUO FLEX

Enables a progressive and reactive flex with precise ski control through all phases of the turn.

### EVO STANCE

Forward lean 14°, ramp angle 4°.

# NEXO LYT

### POWER PLATE AND 50MM VELCRO STRAP

Designed to increase support through the upper cuff, elevating overall performance.

### EASY ENTRY DESIGN

Bi-injected shell with softer material for easier step in performance

# NEW RAPTOR WCR 90 AND 70

## SHORT CUFF DESIGN FOR JUNIOR RACER

**CUFF ALIGNMENT**

Provides more precise adjustment, more stable connection and less friction between shell and cuff.

**RACE BALANCE**

Ramp angle: 4°  
Forward lean (new): 9°  
Forward lean (classic): 16°

**NEW BUCKLE POSITIONING**

The higher screw racing buckle and compact shell don't touch the snow when achieving high edge angles.

**EXTENDED TOE BOX AND MATERIAL**

The longer toe box has been designed to reduce torsion and increase power transmission. Combined with new PU material, provide a more progressive flex, smooth rebound and less vibration for better control.

**NEW WCR BOOT BOARD**

The all-new WCR boot board has no varus, which allows for rapid and easy fitting.

# Z KIDS BOOTS

## SKI NATURALLY, LEARN FAST!

**GEOMETRY**

Jr. Hi-Top - Higher tongue profile and asymmetrical lateral support.

**TWO PHASE FLEX**

Gradual and natural centered balance.

**VARIO LAST DESIGN**

HEAD's Anatomical last has been developed to accommodate the natural growth of kid's feet: Wider last on small sizes.

# FREEFLEX ST TECHNOLOGY

## Less drag, more speed

The HEAD/TYROLIA ST bindings feature the STREAM (ST) toe. With Adaptive Suspension Technology including numerous advanced features, HEAD/TYROLIA introduces the ultimate bindings in the racing segment:

### AERODYNAMIC DESIGN

New aerodynamic design for less drag and more speed.

### ADAPTIVE SUSPENSION TECHNOLOGY

Independently spring-loaded pincers for more precise control.

Two mounting positions of the gliding element for an adjustable pressure point.

A steel base plate between binding and plate for direct power transmission.

STREAM TECHNOLOGY

RACE

### FREEFLEX ST 16

The Freeflex ST 16 ski binding is equipped with the Stream toe and Adaptive Suspension Technology.

# JRS TECHNOLOGY

Thanks to the new Rail System for kids, bindings are mounted in a few seconds. The low weight and the smoother flex make skiing super easy. The new shape of the sole lug and softer brakes allow the kids to step in and out of the binding within seconds and without any help. Compatibility with all ski boot types (A/C/GW A/GW C) completes the new system.

## LIGHTWEIGHT

15% weight reduction

## SMOOTHER FLEX

Locking elements & adjustment levers made from technical polymer

## EASY TO ADJUST

Heel can be adjusted in open position

## STEP IN & OUT IN SECONDS WITHOUT HELP

New shape of the sole lug - easier to position the ski boot correctly in the binding

.....  
Softer brakes - less resistance when stepping down (entry force -15%)

## WORKING WITH ALL SOLE TYPES WITHOUT ANY ADJUSTMENTS

A/C/GW A/GW C

The new JRS bindings are part of the new E4SY series from HEAD/TYROLIA. Providing ski and binding sets that are perfectly matched in terms of easy handling, flex, weight and step-in.

JUNIOR

### JRS 7.5 GW CA

The new JRS 7.5 GW CA guarantees maximum fun. The new binding system delivers a host of benefits: light weight, easy step-in and step-out and compatibility with all ski boot types (A/C/GW A/GW C).

**BOOT BINDING COMPATIBILITY**

In season 2021/22 our bindings have a new marking to show the boot compatibility. The former "AT" marking becomes "MN" (Multi Norm bindings) and "GW AC" changes to "GW CA" to be in line with the industry standard.

TYROLIA®	ALPINE SKI BOOTS (ISO 5355)		WALK SKI BOOTS (ISO 23223)		TOURING SKI BOOTS (ISO 9523)
	TYPE A	TYPE C	TYPE A	TYPE C	
* marking can be found in the product name and partly also on the binding					
Binding without any indication	X				
Binding marked "GW CA"  CA*	X	X	X	X	
Binding marked "GW"	X		X		
Binding marked with "MN"	X		X		X

**EXPLANATION**

<b>GW CA</b>	These bindings will fit <b>Alpine ski boots</b> (both ISO 5355 TYPE A & TYPE C) plus <b>all Walk ski boots</b> (ISO 23223 TYPE A & TYPE C). No further adjustment to boot sole height necessary.
<b>GW</b>	These bindings fit adult <b>Alpine ski boots</b> (ISO 5355 TYPE A) and adult <b>Walk ski boots</b> (ISO 23223 TYPE A). No further adjustment to boot sole height necessary, except for the ATTACK models. Optimal height shall be tested with the boot height adjustment tester.
<b>MN</b>	Bindings marked "MN" will fit adult <b>Alpine ski boots</b> (ISO 5355 TYPE A), adult <b>Walk ski boots</b> (ISO 23223 TYPE A) and <b>all Touring ski boots</b> (ISO 9523). The height of the AFD needs to be adjusted to the ski boot sole height. Optimal height shall be tested with the boot height adjustment tester.

HELMETS

SCAN ME FOR DETAILS!

# DOWNFORCE

A STRONG, DURABLE SHELL IN A STREAMLINED, AERODYNAMIC SHAPE THAT'S ALSO EXTREMELY LIGHT AND INCREDIBLY SAFE. IT HAS A SPEED MODE WITH ACOUSTIC ADAPTERS AND A GATE MODE, WHERE THE ADAPTERS CAN BE EXCHANGED FOR A CHIN GUARD FOR SLALOM DISCIPLINES. TOGETHER WITH THE NEW RACE GOGGLE SENTINEL IT BUILDS THE ULTRAMATCH.

## MODULAR DESIGN

Use the flat adapter plates with optimized acoustics for speed disciplines, the chin guard adapter for slalom disciplines. Both adapter plates are included in the box.

## OPTIMIZED AERODYNAMICS

The outline of the DOWNFORCE is designed to limit air drag to the minimum. The spoiler at the back of the helmet diffuses the air stream and therefore adds to the aerodynamics.

## HIGHEST SAFETY LEVEL

All DOWNFORCE helmets fulfill the highest safety standards and comply to the EN 1077:2007 Class A, ASTM 2040 and FIS RH 2013 standard. In addition, the MIPS Brain Protection System is available for certain models.

# RADAR MEETS 5K

THE NEW 5K LENS TECHNOLOGY WAS DEVELOPED BY HEAD TO INCREASE CONTRAST AND BOOST COLOR BRILLIANCE IN ANY WEATHER CONDITION. THIS NEW TECHNOLOGY IS NOW ALSO AVAILABLE IN OUR AWARD WINNING RADAR AND RACHEL HELMET MODELS.

◆ COLOR BRILLIANCE ◆ HIGH DEFINITION OF CONTRAST ◆ INCREASED ATTENTION

5K CHROME

5K PHOTO

5K POLA

## REASONS FOR RADAR

### RAPID LENS EXCHANGE SYSTEM

Lenses can be swapped on the go with only a click. A variety of visor options are available, enabling you to adapt yourself to changing weather conditions!

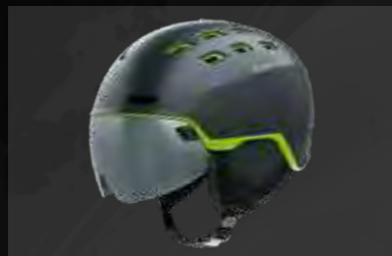

### 5K LENS TECHNOLOGY

5K enhances contrast and boosts color brilliance by filtering specific wave lengths of the visual light spectrum, therefore revealing more details and assuring a safer on-snow experience.

### SPHERE FIT

The patented Sphere Fit system wraps around the head like a beanie. When turning the Boa® reel, the system is adjusted in all three dimensions, creating a snug and comfortable fit.

### RADAR VISION

The full integrated anti-fog double lens features an unrestricted field of vision. It individually adapts to the face, a feature which is not only appreciated by wearers of prescription glasses.

### WIND & WATER RESISTANT

The perfect integration between lens and helmet seals it off against any external hazards, like wind and water.

### YOU NEED MORE REASONS?

Scan the QR code and get more information about our RADAR and RACHEL models.

# > THE NEW COMPACT <

THE NEW COMPACT LINE IS FOCUSING ON THE ESSENTIALS OF A WINTER SPORTS HELMET: GREAT LOOK, PERFECT FIT AND - MOST IMPORTANTLY - SUPREME PROTECTION.

## COMPACT

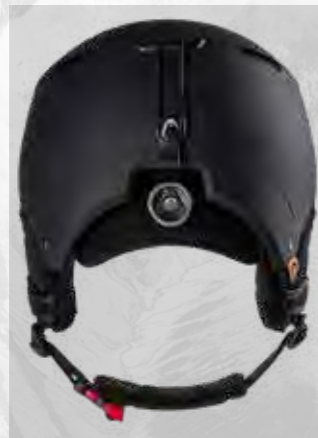

The COMPACT is a super light helmet with a slim profile in a timeless design, supported by a durable ear pad frame. This helmet fits automatically to any head shape thanks to our patented Sphere Fit Auto system, which can also be size adjusted if needed. A comfortable helmet climate is guaranteed by the vent channel system with seven ventilation outlets.

LIGHT WEIGHT - SPHERE FIT AUTO - HARD COVERED EARPADS

### SLIM PROFILE

The outline of this helmet line is optimized to create a neat, integrated look. At the same time, the hardshell construction offers supreme durability.

### HIGHEST COMFORT

From size adjustment to the helmet lining - this helmet line offers supreme comfort. The beanie liner inside the helmet is equipped with cozy microfur, which wicks off moisture and is washable.

### PERFECT FIT

The Sphere Fit system wraps around the head like a beanie. The system is adjusted in all three dimensions, creating a snug and comfortable fit without applying any pressure.

### THERMAL VENTILATION

Thermal Ventilation is our automatic ventilation system which leads warm air away from the head to the outside without allowing any cold air to come inside.

## COMPACT PRO

True to its name, the COMPACT PRO sports a neat, modern outline with a slim profile, which doesn't look bulky on the head. A perfect fit is guaranteed with the patented Sphere Fit system with Boa®. Goggles are seamlessly integrated when worn with the helmet, both from a physical as well as a ventilation perspective.

LIGHT WEIGHT - SPHERE FIT BOA - REMOVEABLE SOFT EARPADS

### COMPACT W

Lightweight and durable helmet with slim profile and Sphere Fit Auto system.

#### ARTICLE NUMBER

326751 dusky rose  
326701 white  
326741 black

#### SIZES

XS/S 52-55 cm  
M/L 56-59 cm

#### PRODUCT FEATURES

Hardshell Technology, 360° Microshell, Thermal Ventilation, Microfur, Beanie Liner, Sphere Fit Auto, Neckgator, EN 1077:2007 Class B

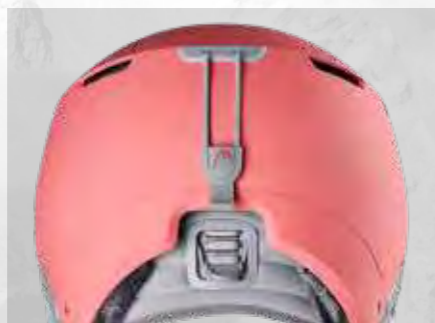

## THE NEW COMPACT W

### SLIM PROFILE

The outline of this helmet line is optimized to create a neat, integrated look. At the same time, the hardshell construction offers supreme durability.

### HIGHEST COMFORT

From size adjustment to the helmet lining - this helmet line offers supreme comfort. The beanie liner inside the helmet is equipped with cozy microfur, which wicks off moisture and is washable.

### PERFECT FIT

The Sphere Fit system wraps around the head like a beanie. The system is adjusted in all three dimensions, creating a snug and comfortable fit without applying any pressure.

## FACTBOX MIPS

THE MIPS BRAIN PROTECTION SYSTEM IS A HELMET-INTEGRATED, LOW-FRICTION LAYER DESIGNED TO REDUCE ROTATIONAL MOTION TRANSFERRED TO THE BRAIN FROM ANGLED IMPACTS TO THE HEAD.

## WHAT DOES MIPS DO?

- 1 The MIPS Brain Protection System is designed to reduce rotational motion transferred to the brain from angled impacts to the head.
- 2 Brain injuries originate not only from direct impacts to the head, but also from rotational forces resulting from impacts occurring at an angle.
- 3 The MIPS technology is scientifically proven to reduce rotational motion by absorbing and redirecting rotational energies and forces transferred to the brain from angled impacts to the head.

LOW STRAIN LEVEL HIGH

# HELMET TECHNOLOGY

## HARDSHELL TECHNOLOGY

This helmet technology is outstanding in longevity and impact protection. For this reason we use it in our race and rental helmets.

## IN-MOLD TECHNOLOGY

The shock absorbing inner EPS layer of this technology is injected into the hard outer polycarbonate layer to create a single comprehensive unit that provides perfect protection at a reduced weight.

## VISOR CONSTRUCTION

HEAD's Visor Construction is a wind-sealed UV protective shield that allows skiers to ride wearing prescription glasses. Like on a motorcycle helmet the visor can be pulled down to protect the eyes while riding.

# HELMET FEATURES

## CONSTRUCTION

### DUAL DENSITY CORE

This patented core technology is made from EPS with dual densities. This increases the helmets performance so it passes the FIS RH 2013 standard.

### TOOLFREE CHINGUARD

The angle of our all-new Toolfree Chinguard can be adjusted individually, without using any tools. The chinguard can also be taken off, when not needed for training, or racing gates.

### 360° MICROSHELL

The 360° Microshell is a polycarbonate layer, which three-dimensionally wraps around the lower helmet lip, that prevents scratches and dents in the helmet's foam.

### MICROSHELL

The Microshell is a polycarbonate layer that prevents scratches and dents in the helmet's foam.

### MIPS

The MIPS Brain Protection System is a helmet-integrated, low-friction layer designed to reduce rotational motion transferred to the brain from angled impacts to the head.

## VENTILATION

### ADJUSTABLE VENTILATION

The opening of the ventilation ducts on the top of the helmet may be adjusted continuously by means of a slide control.

### THERMAL VENTILATION

Thermal Ventilation is our automatic ventilation system which leads warm air away from the head to the outside without allowing any cold air to the inside.

### ACTIVE BOTTOM EDGE

An Active Bottom Edge in Head helmets reduces goggle fogging by delivering active airflow. It does this by allowing air to be drawn from the goggles through the helmet.

### VENTURI EFFECT

The Venturi Effect creates the ideal inner helmet climate. It does so when air passing over the helmet draws out heat and moisture from the helmets inside.

## LINING

### MICROFUR

Microfur is both warming and comfortable on the skin. As a helmet lining it creates the perfect fit and feel for all-day shredding.

### MICROFLEECE

The soft Microfleece material has several functions: It feels good, draws moisture from the skin and transports it away from the head.

### BEANIE LINER

The soft microfleece material of the Beanie Liner adapts perfectly to the head and thus avoids any bruises and the unpleasant entering of cold air. Molded-in mesh zones let heat and moisture escape to the outside and, together with the ventilation system, ensure a pleasant head climate.

### COMFORT ZONE LINER

Soft liner pads provide perfect fit & comfort at a fraction of the weight.

### KID SPECIFIC LINER

This lining is specifically designed for kids, fully covered with soft microfleece, providing perfect fit & comfort at a fraction of the weight.

## EARPADS & FITTING

### NECKGATOR

The Neckgator provides comfort and warmth to the helmet wearer. It adds comfort, fit and excludes the elements.

### REMOVABLE EARPADS/ NECKGATOR

These ear pads and /or neckgator can be removed to suit the variable weather conditions and for cleaning.

### CHANGEABLE ADAPTER PLATES

Use the flat adapter plates with optimized acoustics for speed disciplines, the chin guard adapter for technical disciplines.

### SPHERE FIT

The new and patented Sphere Fit system wraps around the head like a beanie. When adjusting the Boa® reel, it is adjusted in all three dimensions, creating a snug and comfortable fit without applying any pressure.

### SPHERE FIT AUTO

The new and patent pending Sphere Fit system wraps around the head like a beanie, creating a snug and comfortable fit without applying any pressure. Using an elastic band, the fit is adapted automatically but can be adjusted by using the click system in the back of the helmet.

### 360° BOA® FIT

The 360° Fit system by Boa® evenly adjusts the fit of the helmet to all head shapes

### HEAD 3D FIT

Head 3D Fit allows an exact horizontal as well as vertical adjustment of the helmet to the shape of your head.

### HEAD 2D FIT

The size adjustment system may be varied horizontally in order to individually adjust the helmet to your head.

## CERTIFICATION

### METAL CHINSTRAP BUCKLE

The Metal Chinstrap Buckle is both durable and tactile. Made from metal it also adds to the look of a HEAD helmet.

### FIDLOCK BUCKLE

This buckle closes automatically and can be opened easily and conveniently by sliding the buckle laterally with just one hand.

### EN 1077:2007 CLASS B

EN 1077 is the European standard for ski & snowboard helmets, taking into account the results of collision tests to ascertain dampening and puncture resistant qualities of the outer shell. Class B of this certificate certifies helmets with soft ear protectors.

### EN 1077:2007 CLASS A

The certification procedure for Class A is used for racing helmets with hard ear protectors, requiring high standards of puncture resistance.

### ASTM F 2040

The North American equivalent to the European CE-Test uses comparable methods.

### FIS RH 2013

These helmets comply with FIS GS/SG/DH helmet regulations.

# VISORS & LENSES

## INTEGRATED VISOR SYSTEM

The innovative combination of a visor helmet with the advantages of wearing a goggle are integrated into a product which is outstanding in terms of fit, style and performance. The visor automatically adapts to the wearers face and seals off wind and water.

## DOUBLE LENS VISOR

The Double Lens Visor is ventilated, which prevents the lens from fogging. It provides 100% UV protection. Therefore, it is the ideal solution for mountain sports.

## RAPID LENS EXCHANGE SYSTEM

Lenes can be swapped on the go with only a click. Adapt yourself to changing weather in no time!

## PHOTOCHROMIC LENS

This lens automatically adapts its lens tone between category S1 to S3, depending on the weather condition. The lens is toned down in bright, sunny conditions and allows more light to enter the eyes in cloudy, overcast weather conditions.

## 5K LENS

5K enhances contrast and boosts color brilliance by filtering specific wave lengths of the visual spectrum, therefore revealing more details and assuring a safer, less tiring on-snow experience in any weather condition.

## POLARIZED LENS

Polarized lenses are laminated with tiny vertical stripes that only allow vertically angled light to enter the wearer's eyes. Glare is eliminated because the horizontal light waves cannot bypass the vertical filter. This is resulting in increased color and contrast perception, increased attention and reduces tiring.

Bright and sunny conditions require a dimming lens tone.

Versatile lens for changeable weather conditions.

For cloudy or snowy days on the mountain.

GOGGLES

# THE NEW LENS TECHNOLOGY

## SEE CRYSTAL CLEAR

- ◆ COLOR BRILLIANCE
- ◆ HIGH DEFINITION OF CONTRAST
- ◆ INCREASED ATTENTION

LENS TECHNOLOGY IS BASED ON THE PRINCIPLE TO FILTER THE INCOMING, VISIBLE LIGHT AND OPTIMIZE THE PERCEPTION OF COLOR AND CONTRAST. DEPENDING ON THE PURPOSE OF A SPECIFIC LENS, THOSE FILTER CHARACTERISTICS ARE DIFFERENT AND ARE REFLECTED IN THE TRANSMISSION CURVE. THE MOST IMPORTANT FACTOR TO DEFINE THE CHARACTERISTICS OF THE LENS IS THE LENS DYE. THE FORMULA FOR THIS LENS DYE IS THE HIGHEST BRAND ASSET – HEADS FORMULA IS CALLED 5K.

### 5K MODEL OVERVIEW

#### SENTINEL

The flagship of our racing goggle program was developed with speed in mind and offers an extreme wide field of vision, as well as a perfect race helmet integration.

Go Fast. Again Tomorrow.

#### MAGNIFY

Big and bold goggle with magnetic lens exchange system. This model offers the best field of vision and lenses can be exchanged within seconds. Choose the MAGNIFY if you want to have it all!

#### GLOBE

With a large to mid sized frame and a modern, frameless design, this goggle is the right choice for all mountain usage. Lenses can be exchanged with the Speed Snap Lens Exchange System.

#### HORIZON 2.0

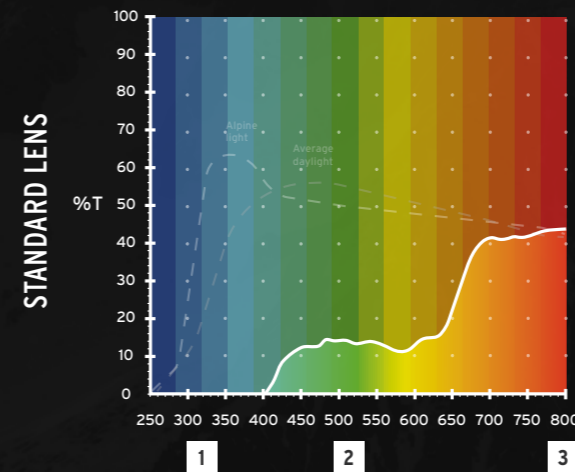

The most popular model of our line was developed together with athletes from race and freestyle and received a new, modern facelift. Lenses can be exchanged with the Speed Snap Lens Exchange System.

#### CONTEX PRO

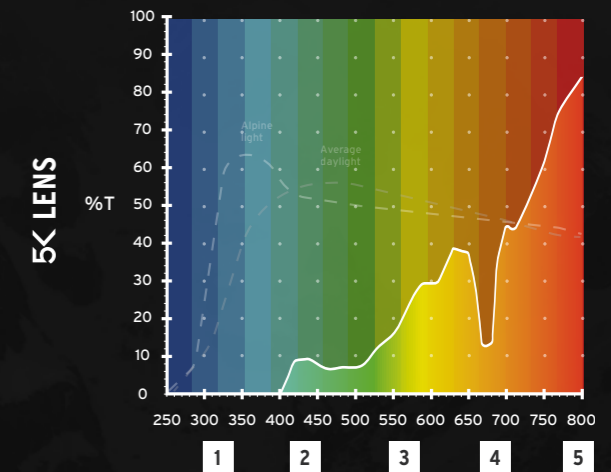

The all-new CONTEX PRO ticks all boxes in terms of features, function and design. The Laminated Double Lens increases the field of vision by 15%. This model is available in medium and large.

### HOW DOES THE 5K LENS TECHNOLOGY WORK?

THE FORMULA TO CREATE 5K WAS CREATED TO SPECIFICALLY BOOST COLOR BRILLIANCE AND CONTRAST, WHILE NOT BEING TIRING AT THE SAME TIME. THE RESULTING TRANSMISSION CURVE SHOWS, WHICH AREAS OF THE VISIBLE LIGHT SPECTRUM ARE REDUCED OR INCREASED, TO CREATE THIS EFFECT.

- 1 UV light is blocked
- 2 short wave lengths (bright light) is reduced
- 3 areas of long wave lengths are increased - this increases the contrast

- 1 UV light is blocked
- 2 short wavelengths (bright light) is reduced, a small peak though assures enough brightness
- 3 increasing mid wave lengths for a true, brilliant color perception
- 4 drop to boost the contrast perception
- 5 areas of long wave lengths are increased - this increases the contrast

### WHICH LENS IS FOR WHAT?

THE MOST IMPORTANT FACTOR TO DEFINE THE CHARACTERISTICS OF THE LENS IS THE LENS DYE. DEPENDING ON THE FORMULA OF THE DYE, THE FILTER CHARACTERISTICS CAN BE OPTIMIZED TO ONLY FOCUS ON SPECIFIC WAVE LENGTHS OF THE VISUAL LIGHT SPECTRUM, HENCE CONTROLLING BRIGHTNESS, COLOR BRILLIANCE AND CONTRAST.

RACE

# MAGNIFY SERIES

The all-new MAGNIFY series is modern, bold and functional. The lens with a toric curvature reduces distortion to the minimum and offers an unrestricted field of vision. The big news is the Magnetic Lens Exchange system - the easiest and quickest way to swap lenses on the go when the weather conditions are changing. By adding a frame seal, the magnetic lens is secured and the goggle protected from wind and water.

# THE NEW CONTEX

THE ALL-NEW CONTEX LINE TICKS ALL BOXES IN TERMS OF FEATURES, FUNCTION AND DESIGN. DEPENDING ON THE MODEL, THIS PLATFORM FEATURES 5K - OUR NEW LENS TECHNOLOGY TO BOOST COLOR BRILLIANCE AND CONTRAST - AS WELL AS A LAMINATED DOUBLE LENS, WHICH INCREASES YOUR FIELD OF VISION BY 15%. EVERY MODEL IN THIS LINE IS AVAILABLE IN MEDIUM AND LARGE.

## CONTEX<sup>PRO</sup>

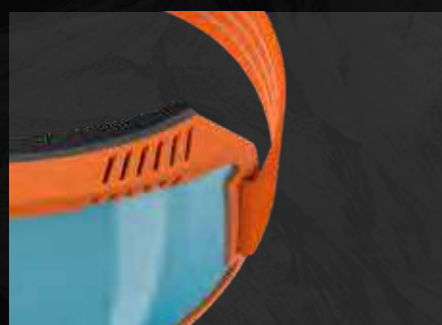

The CONTEX PRO is packed with tons of features and style. The new Laminated Double lens is enhancing the field of vision by 15%, compared to a traditional double lens construction - it also has supreme anti-fog treatment and reduces lens glare. The unrestricted field of vision is supported by our new 5K lens technology, boosting contrast and color brilliance.

LAMINATED DOUBLE LENS - SUPREME ANTI FOG - 5K LENS

## CONTEX

The CONTEX featuring an exchangeable double lens with flashy mirrors, supreme anti-fog and UV protection packed in a modern frame design. Perfectly matching our helmet line, this goggle offers everything you need for every day on the mountain, while being easy on the budget at the same time.

DOUBLE LENS - ANTI FOG - MIRROR COATING

### OPTIMIZED TRACTION STRAPS

The straps outlets of this goggle are placed in the front, therefore assuring a snug and secure fit when worn together with a helmet, by optimizing the traction applied.

### DYNAMIC VENTILATION SYSTEM

The ventilation system is designed to allow air to enter the goggle from three sides, therefore creating an airstream which assures a perfect climate inside the goggle.

### LAMINATED DOUBLE LENS\*

By connecting the inner lens to the outer lens through a lamination process, there is no gap between the two lenses. This increases the field of vision by 15%. A special anti-fog coating is applied to assure a clear vision in any condition.

# GOGGLES TECHNOLOGY

## FEATURES

### EXTREME WIDE FIELD OF VISION

Head's goggles with an extra wide field of vision are perfect for racers, allowing a tight aerodynamic tuck without impaired vision.

### MAGNETIC LENSE EXCHANGE

The quickest lens exchange system we ever developed - swap lenses in a second.

### SPEED SNAP LENS EXCHANGE

Speed Snap Lens Exchange is a fast and easy lens exchange system. Lenses snap in and out quickly and easily allowing a rider to keep up with the changing light conditions.

### INTERCHANGEABLE LENSES

Interchangeable Lenses means that they can be changed to suit light conditions or when damaged. This increases the longevity of a goggle frame and allows for flexibility.

### WIND SEAL

Protects the goggle from wind and water entering the inside.

## LENS

### PHOTOCHROMIC LENS

This lens automatically adapts its lens tone between category S1 to S3, depending on the weather condition. The lens is toned down in bright, sunny conditions and allows more light to enter the eyes in cloudy, overcast weather conditions.

## MATERIAL

### WINDSEALED MAIN FRAME

Windseal Foam is a wind retardant foam. We use it in our downhill race goggles to exclude the rushing wind of racing.

### VENTING FOAM

Venting Foam allows the transfer of air, heat and moisture. When used in our goggles it prevents fogging and creates the ideal climate inside a pair of goggles.

### EXTRA FACEFOAM

For customizing the fit of the goggle to your face, as well as creating the perfect match between helmet and goggle.

### 5K LENS

5K enhances contrast and boosts color brilliance by filtering specific wave lengths of the visual spectrum, therefore revealing more details and assuring a safer, less tiring on-snow experience in any weather condition.

### LAMINATED DOUBLE LENS (LDL)

By connecting the inner lens to the outer lens through a lamination process, there is no gap between the two lenses. This increases the field of vision by 15%. A special anti-fog coating is applied to assure a clear vision in any condition.

### DOUBLE LENS

The Polycarbonate Double Lens is a lightweight lens, that provides 100% UV protection and is 10 times more impact-resistant than conventional glass or plastic. It is therefore the ideal lens for mountain sports.

### UV400 & ANTI FOG

UV400 & Anti Fog refers to the intense UV protective qualities of Head lenses and their ability to minimise fogging. The light on the mountain is intense so you need the best protection possible as well as anti-fogging qualities to maintain the best visibility.

### TRANS VISION TECHNOLOGY (TVT)

TVT is a contrast enhancing technology for variable weather conditions. TVT lenses are also highly scratch resistant.

### TRIPLE LAYER FOAM

Dual-density Comfort Foam with Microfleece is a bonded foam with a soft fleece for added comfort. The two foams serve different purposes, including anti-fogging, climate regulation and padding while the fleece creates the ideal comfort layer between goggle and skin.

### DOUBLE LAYER FOAM

Comfort Foam with Microfleece is a single density foam that regulates a goggles inner climate, cushions and provides the perfect skin to goggle interface.

### SCRATCH RESISTANT

The mirror coating of this lens is applied on the inside. This protects the coating from scratching or wearing off over time.

### POLARIZED LENS

Polarized lenses are laminated with tiny vertical stripes that only allow vertically angled light to enter the wearer's eyes. Glare is eliminated because the horizontal light waves cannot bypass the vertical filter. This is resulting in increased color and contrast perception, increased attention and reduces tiring.

### FMR

FMR is Head's flashy mirror finish to their lenses providing added protection against sunlight. Light on the mountain is intense so riders need the best protection possible.

### MR

MR is Head's single mirror finish to their lenses providing added protection against sunlight. Light on the mountain is intense so riders need the best protection possible.

### FILTER CATEGORY

S1: For cloudy or snowy days on the mountain.  
S2: Versatile lens for changeable weather conditions.  
S3: Bright and sunny conditions require a dimming lens tone.

### COMFORT FOAM

Comfort Foam is a single density foam that allows for the ideal inner goggle climate. Comfortable with venting properties it is the ideal foam for goggles.

### SILICONE LAYER

The Silicone Layer provides added grip between a goggle strap and on-mountain headwear. From helmets to beanies the Silicone Layer keeps goggles in place.

### OTG - OVER THE GLASSES

Prescription glasses can be worn under the goggle, as the goggle offers enough volume on the inside. The face foam is molded on the sides, to give space to the temples of the glasses.

# GOGGLE SPARE LENSES

S3 

Bright and sunny conditions require a dimming lens tone.

S2 

Versatile lens for changeable weather conditions.

S1 

For cloudy or snowy days on the mountain.

# DEVELOPED AND BUILT FOR RENTAL > THE NEW CHARTER <

THE NEW CHARTER RENTAL HELMET LINE WAS DEVELOPED TO OFFER THE MOST DURABLE AND FUNCTIONAL WINTER SPORTS RENTAL HELMET TO THE MARKET, WHILE NOT LOOKING LIKE A RENTAL HELMET AT THE SAME TIME.

# RENTAL HELMETS

HEAD®  
.COM

### RENTAL GOGGLE RETAINER

A new goggle retainer which does not need any screws and can easily be replaced if needed.

### TEXTURED SHELL

The CHARTER features a scratch resistant shell, adding durability and an appealing matte effect.

### SPHERE FIT AUTO

The HEAD patented, free hanging Sphere Fit System assures the most comfortable and secure fit. The system adapts itself to any head circumference within the size range, but can be adjusted if needed.

### HARD COVERED EARPADS

Protecting the soft parts from external hazards and abrasion.

### EASY ADJUST BUCKLE

The buckle is also used to automatically adjust the length of the chin strap, while closing the helmet.

### DURABILITY

The CHARTER features a scratch resistant TEXTURED SHELL, adding durability and an appealing matte effect. Combined with the durable HARDSHELL CONSTRUCTION, the HARD COVERED EARPADS and the new RENTAL GOGGLE RETAINER, this helmet is made for rental.

### USABILITY

With the new SPHERE FIT AUTO system and the EASY ADJUST BUCKLE the CHARTER can be easily adjusted and provides a perfect fit to any customer. A modern, clean helmet design which does not look like a rental helmet.

### SYSTEM INTEGRATION

A subtle but visible COLOR CODING is applied to all models for size identification. In addition to that, each model features a unique BARCODE, which is easy to access but not visible on the outside.

CLEANIE BEANIE PACK

The Cleanie Beanie is the solution for hygienic helmet rental. The thin beanie is made from microfleece and can be worn under every helmet. Low in price, this item can be purchased by the renter and used as a thin standard beanie, also when not wearing a helmet. Available in two sizes (SR/JR) and pre-packed in a ready-to-use counter display.

**FRAMEWALL**

**EVEN POWER DISTRIBUTION**

Comparing to traditional sidewall constructions, the unique Framewall evenly distributes applied edge pressure from tip to tail, while eliminating pressure peaks underneath the binding areas.

**MICRO-SUSPENSION**

While sidewalls are covered and therefore stiffened by different kind of laminates top and bottom, our Framewall is wider and only partly overlapping with the top layers of the board construction.

# TECHNOLOGY FEATURES SKI

**Allride Rocker:** Rocker that is equally at home on bulletproof snow as it is in powder. This profile uses early rise in the tip with regular camber throughout the rest of the ski. 20% rocker – 80% camber.

**Diecut UHM C Base:** This durable workhorse base material is dedicated to all forms of skiing. Diecuts are added for flare.

**E Base black:** Basic black never goes out of style, and it's always durable. Easy gliding is everyone's friend.

**EMC:** Energy Management Circuit – converts kinetic energy into electric energy, that then gets used to absorb negative vibrations.

**ERA 3.0 S :** “Sports version” of ERA 3.0 with a multifaceted ski designed with race innovation and inspiration, yet now with the addition of Rocker, Radius and Rebound. Totally new skiing experience with 10% rocker and 90% camber.

**ERA 3.0:** A masterful blend of three independently important technologies to make the ultimate allcountry skis.

Rocker + Radius + Rebound = Rocker Done Right.

**ERA 2.0:** ERA 2.0 is the little brother of ERA 3.0 and is everything 3.0 has to offer as far as design, performance and geometry integration, but without the addition of “Rebound” with its piezoelectric elements.

**Multilayer Carbon Sandwich Cap Construction:** topless tech construction, triaxle weave of carbon layer combined with Graphene and additional carbon layer for more stability, make KORE lightest ski in its category.

**Highly transparent UHM Base:** A high-density, determinedly durable base that allows gorgeous graphic details to shine through. The perfect combination of fashion and function.

**Intelligence™ Technology:** Piezoelectric elements is used to reduce vibrations and increase stability.

**ISS – Independent Suspension System:** Elastomeric vibration killers located in the tip, tail and underfoot. The elastomers quiet the vibrations that are commonly associated with rockered skis. Underfoot, the vibrations are dampened to provide the skier with a smooth ride.

**Junior Power Frame:** A geometric ski shape that provides structural strength to the outer edges of the ski through geometric design, as opposed to altering the core material or density of the ski. Also, for kids it looks cool and feels different than a standard flat ski.

**LYT Tech Construction:** By developing a ski line with lightweight Karuba wood and Graphene fully embedded we were able to increase performance while making it lighter. A unique weight distribution makes tip and tail thicker and the middle section thinner. The V-shape gives you effortless control for better steering, more stability and control.

**Nivysten Base:** A durable base material which is exclusive to us. It is designed to glide better and not dry out over time. This makes for a better performing base that looks better with less maitenance.

**PNP Rocker:** Very subtle tip and tail rise with regular camber construction underfoot. PNP Rocker provides a rider a smother turn initiation as well as reduced edge contact to seamlessly butter into tricks and initiate spins. 30% rocker and 70% camber.

**Protective Frame Design:** Protective Frame Design includes a concave top to minimize scratches, structured low angle sides to improve durability.

**Protective Frame Structure:** Structured low angle sides to improve durability.

**Power Sidewall Jacket:** An innovation in ski construction that combines the well known fiber jacket construction with ABS sidewalls. A lightweight ski with easy skiing performance including sidewalls for better dampening, shock absorpction and edge grip. Performance at its best for its great target group.

**Race structured UHM C base:** The highest quality, fastest base and finish known to man. The technicians who build the skis for our World Cup Rebels use the same material and machines to put this scary fast base and structure into your skis.

**RD Racing Top Sheet:** A thinner topsheet material designed to maximize responsiveness. Exclusive to our RD skis.

**Rebel Camber:** Some years ago it was years ago, it was rebellious to have rocker. Now, it's rebellious to have camber. With Rebel Camber, we feature explosive acceleration and excellent edge grip for the World Cup Rebel inside you.

**Sandwich Cap Construction:** We take the basic framework from the world cup sandwich and place a cap that just wraps over the top edge of the sidewall to make the ski more suitable for all mountain skiing. Bomber construction with a rounded top edge makes for one incredible allcountry ski.

**Sandwich Twintip Construction:** We blend a full vertical laminate wood core for durability and add our bomber Independent Suspension System for killing chatter. Pipe, park, big mountains, whatever, bring 'em on and let this construction rip.

**Structured Surface:** An extra-durable topsheet with a structured exterior. Designed to hold up against the most extreme abuse.

**Structured UHM C Base:** The same high quality material used in HEAD's world-leading race skis is used here. Different structured running base for all conditions.

**TNT Rocker:** Tip and tail rocker combined with regular camber underfoot. This combination creates a surfy feel in powder while maintaining hard snow versatilty. 40% rocker – 60% camber.

**Tuff-Wall/Base/Edge:** Impact resistant ABS sidewalls. While maintaining responsiveness, Tuffwalls are designed to take a beating. The additional use of thicker edges and running bases ensure that these models can truly be described as bullet proof.

**Twintip Construction:** A vertically laminated wood core, surrounded by a sock of fiberglass and covered by a durable topsheet. This forgiving twin tip construction is slightly softer than our sandwich twin tip layup, making it better for learning pipe and park tricks.

**UHM C Base:** Our highly durable base material for getting the job done well. Not flashy, but steady and stable. The kind of base that will last for years.

**Wood Core Cap Construction:** A vertically laminated wood core, surrounded by a sock of fiberglass and covered by a durable topsheet. This forgiving construction is slightly softer than our sandwich cap making it ideal for ramping up the learning curve.

**Worldcup Sandwich Construction:** The basic construction invented by Howard Head in the 1940's, perfected and hand built by the finest ski technicians in the modern world. The vertical laminate wood core is embraced by speedfreak phenolic sidewalls and the finest Titanal. This is the fastest contruction on the planet. Period.

# TECHNOLOGY FEATURES BINDINGS

**ABS – Anti Blocking System:** The exclusive TYROLIA technology of the ABS continuous band allows the boot to move out of the binding almost without any friction, hence delivering maximum safety in case of icing up, dirt and boot wear.

**AFS – Anti Friction Slider:** New weight optimized adapter for gliding insert at Power Bindings for reduced friction, constant release values and maximum safety.

**AFS Junior:** The innovative mechanical Anti Friction Slider (AFS) automatically adjusts to the boot sole height, compensating A/ C standards as well as height differences due to icing up, dirt or boot wear.

**AFS Metal:** The 68 mm wide slider plus a stainless steel gliding element provides constant release values and results in a broader contact area to the ski boot sole.

**Brakes:** HEAD offers brakes with different width for optimal fit on wider skis and flat skis up to 150 mm ski width in the brake area. Some binding models are delivered without brake – “w/o brake”- to avoid brake exchange later on.

**Climbing Aid:** The climbing aid with its different climbing positions, which can be operated without stepping out of the binding, provides excellent balance and effortless climbing.

**Freeflex Demo:** These racing bindings are for rental purpose. They combine the look and performance of a racing retail binding with the functionality and durability of the rental binding.

**Freeflex Pro:** Best performance enabled by the innovative Freeflex Pro System. The free-gliding heel allows the ski to bend through unimpeded and to retain its natural dynamics. Due to the reduced stand height, the Freeflex band is now much closer to the ski boot. Constant release values reduce the risk of injury and ensure safe ski steering.

**FR Pro Toe:** The Freeride (FR) Pro Toe can be easily adjusted to different boot sole heights. Its horizontal spring reflects the modern architecture of the AAA-Series.

**FR PRO3 Toe:** The new FR PRO3 Toe comes with a new toe design and an improved release kinematic to reduce friction and guarantees constant release values. Thanks to the improved AFD it easily adjusts to different boot sole heights. The optimal height adjustment needs to be tested with a testing device for exact adaptation of the boot-binding system and better performance on skis.

**Full Diagonal:** Intelligent 180° release both horizontally and vertically of the Diagonal Toe and therefore ensures maximum safety in backward twisting-fall situations.

**GripWalk Compatibility:** Ski Bindings with “GW” in the product's name are GripWalk compatible and can be adjusted to Adult Alpine (ISO 5355) and GripWalk ski boots (within ISO 9523). Ski bindings with “GW AC” in the product's name can be used with Adult Alpine (type A), Children Alpine (type C), GripWalk and GripWalk Junior ski boots.

**GW:** Bindings marked with GW will fit adult Alpine ski boots (ISO 5355 TYPE A) and adult Walk ski boots (ISO 23223 TYPE A). No further adjustment to boot sole height necessary, except ATTACK models. Optimal height shall be tested with the boot height adjustment tester.

**GW CA:** Bindings marked with GW CA will fit Alpine ski boots (both ISO 5355 TYPE A & TYPE C) plus all Walk ski boots (ISO 23223, TYPE A & TYPE C). No further adjustment to boot sole height necessary.

**JOY SLR Pro Base:** The 2-piece JOY SLR Pro Base is up to 20% lighter compared to the former SLR Base. The new layer design provides more color options to match perfectly with skis.

**MN:** Bindings marked “MN” will fit adult Alpine ski boots (ISO 5355 TYPE A), adult Walk ski boots (ISO 23223 TYPE A) and all Touring ski boots (ISO 9523). The height of the AFD needs to be adjusted to the ski boot sole height. Optimal height shall be tested with the boot height adjustment tester.

**NX Heel Types:** 3-piece heel for easy step in and step out. Better stability and power transmission.

**RX-Diagonal Heel:** The RX-Diagonal Heel provides maximum safety with a 150° release. Thus, pressure on the knee and ligaments upon twisting forward falls and the risk of injury are reduced.

**SuperLiteRail System:** In combination with the integrated Freeflex-Function the SLR Base provides better energy transmission without affecting the natural ski flex. During the turn, this SuperLiteRail Base guarantees constant force distribution which leads to flawless control, thus enhancing the on hill experience. The remarkable benefits include highly efficient and agile ski performance.

**RX Toe:** The performance oriented RX toe defines stability and power, much as a strong and tough bull extremely durable and absolutely reliable.

**PowerRail:** The unrivalled technology for retail, demo & rental by the well-received rail system on a modular basis provides easiest handling, maximum flexibility, optimized performance, perfect match, more stability and durability.

**Race Diagonal:** Diagonal Toe tuned for racing purposes. Due to its higher release force vertically than horizontally, it holds up to the high backward lean forces in racing.

**Race Pro Heel:** The stand height was reduced according to the actual FIS rules. An increased contact area reduces friction and provides constant forward pressure in all skiing situations.

**SLR Pro Base:** The 2-piece base provides an optimized drill pattern and an enlarged adjustment range of 120 mm. It comes in 3 different mounting positions to cover boot sole lenghts between 183 mm and 363 mm.

**STREAM toe:** The new racing toe features independent spring-loaded pincers for more precise control, two mounting positions of the gliding element for an adjustable pressure point and a steel base plate between the binding and the plate for a better power transmission. Thanks to the new aerodynamic design, even faster runs are possible.

**SX Heel:** Based on new kinematics the ski boot is precisely secure in the binding. This ensures exact and more direct power transmission from boot to edge.

**SX Junior Toe:** The innovative kinematics of HEAD's SX adult line provide advantages in performance and stability for the SX Junior line for young speedsters as well.

**SX Kid Toe:** With the SX kid toe for up-and-comers and integrated innovative SX kinematics ski steering now requires even less effort.

**SX Lite Heel:** Weight optimized heel for junior and light-weight skiers with proven safety features of the HEAD/ TYROLIA binding technology.

**SX Toe:** The kinematic improvements are reflected in the product design of the SX toe as well. With its high cheek bones it reminds of a fox – smart, spry, agile and very clever.

**SX Youth Heel:** The new SX Youth Heel guarantees an easier step-in and out. Due to the new shape of the sole lug and softer brakes the entry force is reduced by 15%.

**Sympro:** With the Rental Sympro bindings, the length of the toe and heel can be adjusted with only a few easy steps. For fast on-hill adjustment.

**Symrent:** With a mobile heel the Symrent bindings can be simply and very quickly adjusted to almost any size of boot.

**Telescopic Tube:** With only one binding model it is possible to cover the entire range of different sole lengths (from 260 mm up to 350 mm).

**TRP – TYROLIA Roller Pincer System:** The TYROLIA Roller Pincer Toe System (TRP System) of the HEAD bindings with its four rollers and gliding inserts ensure a 180° release and exact centering of the ski boot. The TRP system reduces the load on knees and ligaments and improves performance considerably.

# TECHNOLOGY FEATURES BOOTS

## LINERS

**Auto Adapt Tech/ Women Auto Adapt Tech:** Allows the calf of the liner to widen freely. The cuff can move into the space created by the adjustable profile, to comfortably accommodate all calf sizes.

**Double Power Booster Velcro:** The strap of the Double Power Booster Velcro works as a double pulley for better closure and a tighter wrapping on the cuff. The elastic Booster strap allows more dynamic response on the boot. The result is more precise transmission and faster ski reaction.

**HeatFit (HF) Liners:** Multi-component liners with moldable inserts in liner and tongue. 5 minutes of heating, is all that is required, to make the lining adapting and get the perfect precision and comfort.

**Perfect Fit 3D:** Perfect fit is the revolutionary system that ensures comfortable, performances-oriented customization in HEAD's superb skiboots. The 3D pre-shaped construction have been developed to provide the maximum comfort and optimal adaptation to the foot shape.

**Perfect Fit (PF):** Perfect Fit is the revolutionary customization system that provides the best level of precision, comfort and durability. The Perfect Fit material allows the liner to adapt to your feet, ensuring maximum power transmission. 5 minutes of heating at 80 degrees, is all that is required, to make the lining adapting and get the perfect precision and comfort.

**Pro Liners:** Pro Series are thin and very supportive liners developed to assure maximum wrapping and extreme high performance. They come with a stretchy upper material, thermo-moldable ankle inserts and a rear sliding insert.

**Quick Entry Liners:** These liners come with a unique easy entry construction in the forefoot. Developed both for skiing and walking, Quick Entry liners always feel extremely comfortable.

## BUCKLES

**Buckle Lock:** Lock the buckle's bail in place for a secure fit while ascending.

**Double Power Lever:** The Double Power lever reduces the effort needed to close the buckle by 50%. Developed and patented by HEAD.

**Spineflex Buckle:** A revolutionary buckle concept with a flexible element and a constant closure point. The flexible element allows the buckle to adapt to the shell profile. The constant closure point increases the overlap between the shell flaps and reduces pressure points. The increased comfort and precision results in better performance.

**Spine-Tech Buckle:** The Spine-Tech buckle features a constant traction closure point. This translates into a reduction in pressure points, an increased overlap between shell flaps, more comfort, and more precision.

**Superleggera Buckle:** The new light buckles: 90% aluminum, simple, effective and reliable.

**Supermacro Ratchet:** An adjustable, ratcheted toothplate that provides 28mm of calf-adjustment.

**Wide-Body Buckle:** Oversize buckle designed for an extreme ease of use. The fastest way to close the boot's cuff.

## FEATURES

**Adjustable Rear Spoiler:** Height adjustable spoiler increases rearward support as it's raised.

**Bi-Inj. Frame:** A high performance, multi-density shell that optimizes easy entry, foot wrapping, comfort and energy transmission.

**Double Adjustable Profile:** A double mechanism in the upper rear part of the boot which adapts the circumference of the cuff up to 1cm to fit individual anatomical needs. Located on the either side of the cuff's spine, this mechanism allows the cuff to adjust up to 1cm to better fit the anatomical needs of skier.

**Duo Flex:** Enables a progressive and reactive flex with precise ski control through all phases of the turn.

**Easy Entry Shell Design:** Located in the throat of the boot, 4 channels are cut into the plastic to reduce the thickness of the material and thus provide smoother entry and better wrapping to the foot.

**Extended toe box:** The longer toe box has been designed to reduce torsion and increase power transmission

**Flex Stance Tuning:** Screw mechanism with a plate support on the spine of the cuff. By adding the screw(s) the link between shell and cuff becomes stronger and the flex of the boot stiffer. It also works as a forward lean adjuster.

**Flex Tuning:** A screw mechanism on the spine of the cuff that links shell and cuff. To get a softer flex, the screw(s) can be replaced by the plastic caps included in the box.

**Form Fit:** 100% customizable shell fit system. New Form Fit plastic holds modifications better than ever.

**Graphene:** The Graphene infused plastic combined with the new Smart Frame shell delivers the perfect balance of performance, comfort and lightweight design.

**Hi-Top Tech:** Direct contact between the boot tongue and shell delivers supreme support for more confident skiing.

**Integrated AutoSkiWalk (ASW):** HEAD patented integrated device which automatically switches between skiing and walking position when stepping in or out of the bindings.

**Liquid Fit:** Material provides the most precise and the quickest customization. The material's density ensures the perfect mold in the most critical area of the boot, the ankle and heel pocket. The performance and precision of a foam liner in 10 easy, comfortable minutes.

**Power Control Frame:** Designed to reinforce the Cube 3 line shell structure in order to give more stability and performance to the boot.

**Power Plate:** HEAD has designed a Velcro spoiler to increase support through the upper cuff, adding a higher level of performance.

**Ski-Hike Mechanism:** 45° Range of motion: provides strong, precise connection between upper and lower boot.

**Smart Frame:** The new lightweight shell construction is specifically designed for a more dynamic rebound that greatly improves performance for the all mountain skiers.

**Stiffer/Softer Flex Adjustment:** It's an adjustment placed on the spine of the cuff to select between a stiffer or softer flex depending on snow condition and level of skiing.

**CUBE** Easy as 1, 2, 3. Developing our cube3 line, we decided to tackle the one challenge every skier faces every day on the mountain: To combine great skiing performance with great walking performance. After all, on any given day, we spend up to 30% of our time outside of the binding.

### EASY IN

Thanks to a new quick entry geometry, the Cube3 is extremely easy to get into. Simply tilt back the shaft and step in. In addition, the 3-buckle construction with an oversized top buckle allows easy and quick buckling in and a great, snug fit.

### EASY WALK

Outside of the binding, the shaft of the Cube3 is always unlocked, allowing natural walking. This, in combination with the (patented) SoftWalk heel and grip system on the heel, makes the Cube a superb walking boot.

### EASY SKI

The moment you step into your binding the patented integrated AutoSkiWalk mechanism blocks the shaft, allowing you to speed off down the mountain without bowing, bending or buckling.
