# DOING OUR PART...

## SUSTAINABILITY PROGRAM

In the 30 years of the company's history, Level has established itself as the world's leading innovative brand in the glove category; high-performance manufactured products to cope with any weather conditions. The brand dedication to create long-lasting and high-quality products has distinguished Level since the beginning.

From the invention of the Snowboard Glove to the launch of many innovations, Level aims to be a leader in responsibility by combining sustainable development with the innovative strength of the brand. We are committed to always being responsible, honest and accountable today.

We strive to create the most beautiful, desirable products with the least impact on our environment. The consciousness about the environment is also an inspiration in the development of our products. As leaders in our winter sport segment, we endeavor to create the most cutting-edge materials, continuing to push towards circularity.

## MATERIAL USED:

**LEATHER:** Level uses the best and finest Leather coming from certified producers and being the animal grown for food; the leather is a waste recycled to make the products; no animal grew up for the sole purpose of using the skin.

**PALMS:** Level has almost completely dismissed the use of PVC material for the palms; more than 80% of our models have leather palms.

**FABRICS:** most of shell materials are synthetic materials which means from plastic origin; Organic Fabrics are made by natural fibres. Considering the purpose for which Winter gloves are designed (Sport Activities), fabrics made by natural fibres only are most of time not indicated to resist and perform for the scope; the best compromise nowadays is to mix the natural fibres with synthetic fibres (This solution brings much more performance and is more suitable for sport products like gloves).

**LINING:** (material in contact with the skin) Level uses different solutions including eco and biodegradable material like Wool, Silk and Cashmere.

**INSULATIONS:** mostly synthetic and in some cases Swiss Wool 100% natural wool. Primaloft, Level loft and other insulations are made by polyester. We are approaching more the use of recycled insulations like Primaloft Silver that is 100% recycled.

**MEMBRANES:** At the moment we use what is available as membrane for gloves in the market and both Goretex and Membratherm come from Polyurethan.

## PFC FREE

PFC is a treatment on shell materials. What Does PFC-Free Mean?

When outdoor clothing and gloves are described as PFC-free, it usually means that it's been treated with a DWR that repels water without needing to use PFCs. PFC stands for Perfluorinated compounds. Perfluorinated compounds are used in the process of waterproofing gloves, they're the chemicals that form the outer layer of protection for the fabric, so that water deflects and beads up when coming into contact with it.

## CERTIFICATION

Level buys materials from suppliers certified Oekotex 100 or BlueSign for chemical treatments and PFC free. Level is engaged to buy materials that are certified to guarantee the traceability of the source. In collection 2022-23 Level introduces the first project 100% made by recycled fabrics, insulation, membrane, and lining: the new Animal Junior. This project will be continued expanding to other models in the future with the objective to move towards an always more responsible and higher reduced impact on environment.

## RESPONSIBLE DESIGN:

**FUNCTION AND EASE OF USE:** All products are designed to be functional, comfortable, warm and with the exact performance they are studied for.

**MATERIAL LONGEVITY AND EFFICIENCY:** Level is known to be high quality and one of the most durable brands in the market; The long lasting product cycle means responsibility for the environment: Level products are made to last from 3 to 4 times longer than the average product on the market. This Level value and concept is easily understood from consumers and part of the Level strategy since the beginning!

**TRIED AND TESTED:** all our products go through rigorous testing before being launched on the market; this to ensure that all characteristics are taken into consideration for a long lasting life of our products.

**THE LEVEL CORPORATE SOCIAL SUSTAINABILITY PROGRAM** also includes the fact that we also take responsibility about the choice of suppliers who have ethical behavior and we find it just as important to regularly visit our producers and form an opinion with our own eyes.

Production timing and shipment organization is also a priority for us therefore planning in advance the production schedule is fundamental to avoid as much as possible by air transportation to maintain footprint low.

**ALPINE SKI TEAM:** Kjetil Jansrud, Innerhofer Christof, Aleksander Aamodt Kilde, Luca De Aliprandini, Trevis Ganong, Adam Zampa, Erik Read, Atle Lie McGrath, Razzoli Giuliano, Emanuele Buzzi, Alex Vinatzer, Federica Brignone, Bridger Gile, Britt Richardson, Cassidy Gray, Charlie Raposo, Elena Curtoni, Marsaglia Francesca, Ragnhild Mowinckel, Breezy Johnson, Erin Mielzynski, AJ Hurt, Alex Tilley, Filippo Della Vite, Kyle Negomir, Marte Monsen, Nina O'Brien, Paula Moltzan, Riccardo Tonetti, River Radamus, Roberta Melesi, Thea Stjernesund, Timon Haugan, Trevor Philp, Valérie Grenier

**SNOWBOARD TEAM:** Jonas Boesiger, Nicola Liviero, Nicolas Huber, Christoph Lechner, Marc Grossgasteiger, Mario Kaeppli, Thomas Feurstein, Simon Gruber, Mario Wanger, Lukas Ehrler, Stefano Munari, Lia Mara Boesch, Michela Moioli  
**FREESKI TEAM:** Andri Ragetti, Alex Ferreira, Ralph Welpner, Matěj Švancer, Fabian Bösch, Leonardo Donaggio, Lukas Schäfer, Tao Kreibich, Bruno Compagnet, Lucas Swieykowski, Giuliano Bordoni, Flo Bastien, Brady Leman, Kelsey Serwa, Marielle Thompson, Coline Ballet-Baz, Giulia Tanno, Silvia Bertagna, Sierra Quitiquit, Lara Wolf

# THERMOPLUS GUARANTEES WARM HANDS

Choosing the appropriate material for the construction of gloves and mittens is of great importance in order to achieve ergonomic comfort and high thermal insulation. The thermal insulation and moisture management of LEVEL products is created through the use of different specific materials. These materials have been tested in both a climatic chamber and in outdoor conditions using wireless sensors combined with infrared thermography. The results show significant differences in terms of thermal comfort between the gloves, proving that LEVEL provides the best thermal comfort for all its products. Thermoplus products values aim to be at least 30% higher than standard gloves.

**LEVEL uses over 30% more insulation**

**than the average market products**

**ONLY TOP-QUALITY MATERIALS AND MULTI LAYERS TECHNOLOGY IN ORDER TO REACH THE HIGHEST INSULATION ON THE MARKET**

## THERMAL CERTIFICATION INDEX™ - (TCI)

To facilitate the choice of the perfect glove in all weather conditions, LEVEL has developed a 5-level thermal certification index, from cooler to warmer.

**THERMOPLUS™**  
**1000**  
**LIGHT**  
 -5°C | 41°F

DOWN TO  
 -5° C | 23° F

**SCIENTIFIC TESTS PERFORMED UNDER THE AUSPICES OF THE DICAM DEPARTMENT OF BOLOGNA UNIVERSITY - ITALY**

## SCIENTIFIC TESTS TO GUARANTEE THE THERMOPLUS CERTIFICATION

The choice of the appropriate material for the construction of gloves is of fundamental importance in order to achieve ergonomic comfort and high thermal insulation. The thermal insulation and the moisture management of gloves made of different materials have been tested both in a climatic chamber and in outdoor conditions using wireless sensors combined with infrared thermography. The results obtained show substantial differences in terms of thermal comfort between the gloves in the same environmental conditions, proving that level provides the best thermal comfort in all of its products.

# 3 YEARS WARRANTY PROGRAM

---

LEVEL offers a Limited Warranty against manufacturing defects. LEVEL will repair or replace, at its discretion any products found to be defective within the scope of normal and appropriate utilisation and are within the Limited Warranty covenants which exclude normal wear.

(All Gloves) - Two, (2) or Three, (3), Year Limited Warranty (as specified on the product). LEVEL offers a Two, (2) or a Three, (3), Year Limited Warranty, from the time of initial purchase, against manufacturing defects. LEVEL will repair or replace, at its discretion any products found to be defective within the scope of normal and appropriate utilisation and are within the Two, (2) or Three, (3), Year Limited Warranty covenants which exclude normal wear.

Two, (2), Year Limited Warranty on Beanies, Bags and Ski poles.

LEVEL will repair or replace any of the above-mentioned products from the original purchase date against manufacturer's defects within the scope of normal and appropriate utilisation and within the Two, (2), Year Limited Warranty covenants which exclude normal wear. Claims should be presented at the point of initial purchase with proper documentation to validate claims thereunder.

## HOW TO ACTIVATE THE WARRANTY

To activate the warranty please visit </support/online-warranty-registration/> and register your LEVEL product within 14 days from purchase. Please complete all of the required fields to activate your warranty. You can also upload copy of your purchase receipt. If you do not upload a copy of the receipt, please keep your original receipt in the event you have a defective claim for the LEVEL product purchased.

## COVER AND EXCLUSIONS

LEVEL warranty covers any type of manufacturing or material fault. With regards to this warranty, any non-conformities of the product with your expectations cannot be considered as faults. The warranty expressly excludes any damages caused by: misuse; normal wear and tear, damages; tampering; incorrect handling of the gloves; negligence or carelessness; damages caused by falls and/or accidents or any alteration due to external causes, including any repairs carried out by unauthorised vendor; damages caused by factors/events outside LEVEL's control; users' subjective assessments, such as comfort and fit; damages caused by prolonged exposure to light and/or heat sources. All coverage under this warranty is void if any modification, change or alteration has been made to the product.

## HOW TO USE THE WARRANTY

To activate the warranty, please supply LEVEL with:

- A) the product your warranty claim, through any LEVEL "authorised" point of sale in the country you reside in;
- B) the original purchase receipt; if you did not upload your original receipt during at the time you registered your product.

LEVEL shall check its registration on the [levelgloves.com](http://levelgloves.com) website within the terms stated by these regulations. For any further information, please contact LEVEL Customer Service at [warranty@levelgloves.com](mailto:warranty@levelgloves.com).

LEVEL reserves the right to check on the fault you are complaining about and to carry out any repair or replacement after said check. If, following LEVEL's check, the fault is not considered a manufacturing or material fault, LEVEL reserves the right to charge the customer for the repair and repair as well as shipping costs.

If LEVEL cannot repair or replace the product or parts of it, LEVEL will make you an offer, taking into consideration the age of the product, for its replacement with the same model or an equivalent model.

## HOW TO WARRANTY YOUR LEVEL PRODUCT(S)

1. Scan the QR code and complete all of the required fields to activate your warranty

2. Visit your LEVEL Authorised Retailer.

Bring your LEVEL Product in question with your receipt to where the product was purchased.

# CUSTOM FIT

This new unique system gives the opportunity to customize the glove/mitten to the anatomical shape of the hand. The padding is made with a breathable thermo-formable material, that after being heated at 80°C, takes the shape of the skier's hand. This customization process can be repeated as often as wanted. The Custom Fit improves comfort, sensitivity and offers a better grip to the ski-pole handle.

## SPECIAL QUALITIES:

- Durable - Warm and comfortable
- Lightweight - Heat Moldable (Thermo-formable)
- Excellent memory
- Low shrinkage when heated, shaped and cooled
- Re-moldable
- High bond strength
- Non-toxic
- Does not absorb water

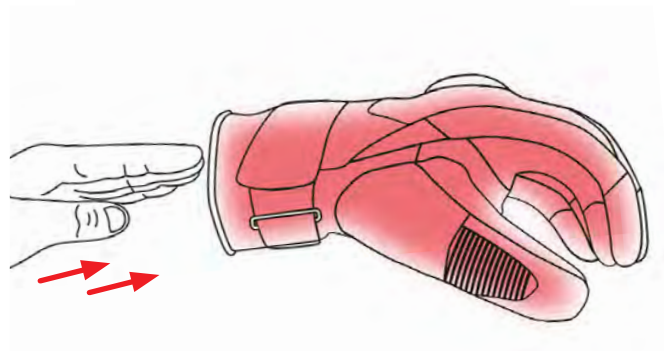

Heat the outside of the glove with a hairdryer at a maximum temperature of 80 degrees at a distance of 30 cm or where available, use the LEVEL oven -

1

Put the glove on, close the strap and let it cool for about 5 minutes -

2

This customization process can be repeated as often as wanted -

3

# LEATHERS

With over 20 years of experience in the world of snow sports and ongoing research, LEVEL has always aimed to choose the highest quality fabrics and leathers for their wide range of gloves which are differentiated by thickness and quality specifications for their many uses.

## **WATERPROOF GOATSKIN:**

A soft waterproof leather, used mainly for ski gloves in areas which are exposed to high abrasion such as the palms or between the thumb and index finger.

## **HAIRSHEEP PITTARDS:**

A waterproof leather that is exceptionally soft, used especially on the backs of the gloves.

## **SHEEP SKIN:**

A very soft leather used for women's gloves, especially on the back of the hand to give the glove extra softness.

## **COATED WATERPROOF GOATSKIN:**

This leather is used on the palms of freeride gloves, its exceptional waterproof resistance keeps the glove dry and long lasting.

## **QUARTZ PITTARDS LEATHER:**

Pittard leather has a lasercut design providing an extra strong grip in specific points of the palm.

Dragon pittards:

This waterproof goat leather has a design that makes it special and durable. It is used on the palms of snowboard gloves.

## **KERATAN TREATMENT:**

KERATAN is a unique leather treatment designed to significantly increase the abrasion protection and durability of finest performance goatskin leathers. The benefits of KERATAN are: resistance to extreme LEVELs of abrasion, functionality and comfort. The long effective life combined with FireBloc II, can make them flame resistant to the Martindale abrasion test; 45,000 revolutions to hole (average value 1mm thick WR100).

# FABRICS

The choice of fabrics is made by our R&D department, in collaboration with top athletes and advice of different stylistic groups from all over the world. We follow the main trends in style and color but keeping as the primary objective fabrics with exclusive features, both in structure and trend that makes them unique and inimitable.

## **SPRAY TEST:**

All LEVEL fabrics are tested with the "spray test" to be approved and certified for maximum water resistance.

# POLYGIENE

## WHAT ARE THE BENEFITS OF POLYGIENE STAYS FRESH TECHNOLOGY?

The silver salt (AgCl, silver chloride) in Polygiene inhibits and guards against the growth of odors from microbes such as bacteria, fungus and mildew.

**WITHOUT POLYGIENE BIOSTATIC**  
ODOR-CAUSING BACTERIA/MICROBES  
SETTLE AND MULTIPLY IN MATERIAL

**WITH POLYGIENE BIOSTATIC**  
BIOSTATIC STAYS FRESH TECHNOLOGY INHIBITS  
GROWTH OF ODOR-CAUSING BACTERIA

## THE POSITIVE EFFECTS FOR YOUR LEVEL GLOVES:

- **STAYS FRESH** Polygiene inhibits the growth of odorcausing bacteria for that fresh-all-day feeling. Odor develops when odor-causing bacteria settles into the fabric, mixes with sweat and multiplies.
- **STAYS HYGIENIC** Polygiene helps prevent odor and prolongs the lifetime of your gloves, since the products are treated to resist deterioration by mold fungus and odor-causing bacteria.
- **HAVE A LIFETIME EFFECT** The treatment will last life- time of the product.
- **BE MORE CLIMATE SMART**

**Wear More. Wash Less®** Polygiene treated products can be used several times before washing and can be washed at lower temperatures which means that you save energy, water, time and money. Longer lifetime of your gloves – Fibers live longer without bacteria and excessive washing, and treated products are not discarded prematurely due to odor. - Less luggage can be used when traveling. - Recycleable – Polygiene-treated products can be recycled when worn-out. - Polygiene is bluesign® approved – the textile industry’s demanding environmental certification with a life-cycle approach.

**WHAT IS POLYGIENE AND HOW DOES IT WORK?** Polygiene is based on silver salt (silver chloride). Silver chloride is naturally present in water and soil. Polygiene particles have a large amount of silver ions per surface area. Due to the structure of the particles, very small amounts of silver are required for effective treatment. Polygiene is co-applied with other treatments to the fabric during the finishing stage. This helps minimize the impact on the environment because additional energy or water is not required.

**ANY EFFECTS WHEN WORN NEXT TO SKIN?** Background in the healthcare sector Polygiene has its heritage in the healthcare sector and has undergone extensive skin sensitivity testing. No interference with bacteria naturally occurring on the skin Polygiene is active only on the material's surface and does not interfere with bacteria naturally found on the skin, even when used for long periods of time. Tests also conclude that there is no identified risk from dermal and oral contact with silver treatments Polygiene is not nano silver.

Be Climate Smart  
**Wear More. Wash Less®**

# FIT SYSTEM

The close collaboration between R&D and athletes has allowed LEVEL to develop a fit system for skiers and riders that can ensure the best fit for every kind of performance along with maximum comfort. For this reason all the gloves are divided into 3 different fits and are specifically designed for male and female hands.

## RELAXED FIT | EXTRA WARM

**SKI STYLE:** designed for all who love powder with a new cut that allows for a more abundant fit. This new style allows for more protection from the cold while maintaining a good level of sensitivity for the hands.

**SNOWBOARD STYLE:** mainly used in the protection segment line that allows the housing of Biomex, and creating the right balance between warmth and comfort.

## NATURAL FIT | VERY WARM

**SKI STYLE:** designed for skiers that require more warmth and greater comfort. Ensuring the fine balance between precision and sensitivity.

**SNOWBOARD STYLE:** mainly used as cold weather choice of the LEVEL's pro team. The perfect combination between style, comfort and function.

## SLIM FIT | BETTER GRIP

**SKI STYLE:** for our World Cup athletes who need a perfectly tight fitting glove allowing them to have great feel when holding the ski poles so they can perform their best on the racetrack.

**SNOWBOARD STYLE:** this is a fashionable product; the better fitting the better the rider can grab their board or freestyle skis. Apart from its tight fit the palm has a special reinforcement to increase the grip.

# SIZING CHART

CIRCUMFERENCE CM - INCH		HAND LENGTH CM - INCH		MEN'S SIZE WORLD - USA		WOMEN'S SIZE WORLD - USA		JUNIOR'S SIZE WORLD - USA	
11	3,93	13,4	4,88	-	-	-	-	4 - Jr XXS	Jr XS

28	10,43	23	8,74	11 - 4XL	XXL	-	-	-	-

Two things to consider regarding size and measurements of the hand.

## HAND LENGTH

With your hand open, measure from the tip of your middle finger, down to the base of the palm drawing a straight line.

## HAND CIRCUMFERENCE

With your hand open, measure around the circumference of your hand, at the base of your knuckles.

## CHILDREN'S FORM 6 MONTHS UP TO 12 YEARS OLD.

00 size	0 size	I size	II size	III size	IV size	V size	VI size
6-12 Months	1-2 Years	2-3 Years	4-5 Years	5-6 Years	7-8 Years	9-10 Years	11-12 Years

# PROTECTION FROM WATER

## GORE-TEX GRIP GLOVES

Grip is not just about surface texture on the palm and underside of your fingers—it's also about how your gloves fit. The layers in GORE-TEX Grip Gloves are bonded tightly together so there's no movement between them. That means you can grip your ski poles or work your motorcycle brakes with ease. Better grip also means better confidence, so you can trust yourself to push on.

## GORE-TEX 2IN1 GLOVES

Each glove has two chambers: choose one for better grip, the other for extra warmth. The better grip chamber brings your fingers closer to what you need to grip, increasing dexterity and tactility—perfect for handling ski poles or motorbike handlebars. The warmth chamber offers your hand added insulation—preventing numb fingers when the temperature drops.

## GORE-TEX PLUS WARM GLOVES

If you're traversing backcountry all day, you want to avoid numb fingers. Even in harsh, cold conditions the whole system of inner lining, membrane and outer material is optimized to keep your hands warmer for longer. With GORE-TEX Plus Warm gloves, you never need to go home early again. They're also totally windproof, breathable and carry our GUARANTEED TO KEEP YOU DRY™ promise.

## GORE-TEX ACTIVE GLOVES

The most breathable GORE-TEX gloves available. The whole system of inner lining, GORE-TEX membrane, and outer material is optimized for extreme breathability. Even during intense activity less heat accumulates and more moisture can escape, so your hands stay drier, cooler, and more comfortable.

### GORE-TEX INFINIUM™ WINDSTOPPER® GLOVES

We have higher standards than most, because we know that wind chill gets to fingers very quickly. The WINDSTOPPER® membrane is rigorously tested to prove it blocks not just some, but all wind. Even if you're trekking against the strongest mid-winter gales, your fingers stay more nimble, and your hands more comfortable.

### MEMBRA-THERM PLUS

A highly breathable membrane insert that creates a waterproof barrier between exterior layer of the glove and the insulating materials. It optimizes warmth and comfort by keeping the hands dry.

### WATERPROOF LEATHER TREATMENT

Special treated leather that withstands tough, outdoor conditions. The leather is waterproofed and its structural properties provide effective protection against moisture.

### WATERPROOF FABRIC TREATMENT

The fabric is laminated with a process that permits to add a breathable waterproof membrane to the outer material, optimizing warmth and comfort while keeping the hands dry.

# INSULATION MATERIALS

## GOOSE DOWN

LEVEL products are insulated with exclusive, high-fill power goose down ranging from 550 to 900 fill, which represents the highest quality down commercially available. The down is isolated in small chambers so there is no fill migration; this ensures goose down even distribution and a great insulation performance.

## PRIMALOFT®

Soft insulation fabric. An insulation that is water repellent! Unlike down, it won't hold water so it even keeps you warm when it's wet! A warm and soft feeling that offers good breathability.

## THERMOLINER

Soft, supple, and less bulky than high-loft insulation. The exclusive blend of fibres traps in more air for more warmth.

## SILK

LEVEL is presenting a new silk lining in the women's line which offers a great softness and increases thermal insulation.

### CASHMERE

Cashmere is usually indicated by an incredibly soft finish, which is a result of delicate fibres that are almost silky to the touch. This sought-after fabric is made in Italy using advanced technologies and is three times more insulating than sheep wool.

### THINSULATE™

The unique microfibers of Thinsulate™ insulation are ten times smaller than the fibres of other synthetic insulations, which means they're much more efficient at trapping air and keeping in the warmth. It will avoid the formation of cold spots in your hands by filling all the multiple airspaces.

### LOFT PREMIUM

The new LEVEL insulation solution. Soft feeling and thermal benefits together.

### POLARTEC®

Polartec® Power Stretch® fabric features 4-way stretch and it is very breathable. It provides warmth without weight. The 4-Way stretch system provides unrestricted freedom of movement. It keeps skin dry even when you sweat, maintains hands warm without the weight and bulk of traditional insulating fabrics and will reduce the effects of wind chill thanks to its fabrics.

### SWISS WOOL

This natural material is characterized by thin fibres which do not retain odours making this type of wool antimicrobial. Wool provides warmth and draws sweat away from the skin, keeping a sensation of dryness.

## » CATEGORY HIGHLIGHTS

The LEVEL Racing Collection are World Class simply the best available in the market today. The Racing collection has dynamic cutting-edge styles that always deliver the best all-out performance. Racers need warmth as well as protection so materials like wool linings, Superfabric and Dyneema stitching are all utilized. WC and SQ Models can be heated for a "Custom Fit"

## » TARGET CONSUMER

Racers of all levels looking for the best experience in the racing world.

# RACING

Racing takes the LEVEL spirit into the competition world with its young, dynamic and cutting-edge styles that always deliver the best all-out performances. All new ski models satisfy the highest performance requirements without compromising warmth and comfort.

**WARMTH INDEX:** 3000 - Warm

**FIT:** Natural **MATERIAL:** Waterproof goat leather, Superfabric, Waterproof goat leather palm **INSULATION:** Thinsulate™, Wool lining with Polygiene treatment

**HIGHLIGHTS:** Special gate protection, Kirak Stimulator System **FEATURES:** Sublimation on back, Outside stitching, Silicone grip, Dyneema stitching, Superfabric, Custom fit, Graphene lining

66 goldeneagle

#### CUSTOM FIT

This new unique system gives the opportunity to customize the glove/mitten to the anatomical shape of the hand.

#### OUTSIDE FINGER STITCHING

This construction provides a better fit and a perfect grip.

#### KIRAX STIMULATOR SYSTEM

This innovative technology stimulates the body's neurological system in a unique way to enhance reaction time, performance, and a sense of general well-being.

#### WATERPROOF GOAT LEATHER

A soft waterproof leather, used mainly for ski gloves in areas which are exposed to high abrasion such as the palms or between the thumb and index finger.

#### PULLER

A wider puller inserted in underside of cuff helps to properly wear the glove/mitten

#### GRAPHENE LINING

Graphene offers perfect thermoregulation as it distributes the heat evenly. It is also totally waterproof, while being very breathable.

## SUPERFABRIC®

SuperFabric® is a material that's longer lasting, has higher durability, and is designed for everything from extreme applications to rugged daily usage.

## WOOL LINING

Wool is an excellent insulator, resistant and breathable, it is naturally absorbent and does not capture odors. Thanks to these unique characteristics, it is one of the favorite materials for our linings.

## PULLER

A wider puller inserted in underside of cuff helps to properly wear the glove/mitten.

## SPECIFIC PALM CUT

The improved palm-shape facilitates gripping ski poles and offers better sensibility.

**FIT:** Natural **MATERIAL:** Waterproof goat leather **INSULATION:** Level Loft, Light fleece **DRY TECHNOLOGY:** Membra-Therm Plus **FEATURES:** Stretch-knit cuff, Storm leash

15 anthracite

01 black

35 black-white

05 beige

**SHORT GAUNTLET STYLE**

The short under-cuff can easily be tucked into your ski jacket for more agility and less bulk getting in your way of wrist movement.

**MEMBRA-THERM PLUS**

A highly breathable membrane insert that creates a waterproof barrier between exterior layer of the glove and the insulating materials. It optimizes warmth and comfort by keeping the hands dry.

**WATERPROOF GOAT LEATHER**

A soft waterproof leather, used mainly for ski gloves in areas which are exposed to high abrasion such as the palms or between the thumb and index finger.

**STRETCH-KNIT CUFF**

A super-soft fleece lining handles the warmth and moisture management, while the stretch-knit cuffs seal out cold air and snow while allowing for easy on and off.

## » CATEGORY HIGHLIGHTS

The Alpine line provides exceptional performance, combined with technical features and style. This line offers warmth and function at a great value.

## » TARGET CONSUMER

From beginners to advanced skiers, looking for best quality, comfort and great value.

# ALPINE

The Alpine line is designed for skiers demanding high-performance, quality materials and elegant lines. Built in years of studies and on-snow testing, this line is proven to be the best call for those who loves carving up the hills.

#### MULTILAYER PRIMALOFT®

Soft insulation fabric. An insulation that is water repellent! Unlike down, it won't hold water so it even keeps you warm when it's wet! A warm and soft feeling that offers good breathability.

#### STORM LEASH

This cord is used to secure the glove to your hand with an adjustable plastic. A big advantage when you don't want to wear gloves but want to keep them attached to the wrist.

#### SILK LINING

LEVEL is presenting a new silk lining in the women's line which offers a great softness and increases thermal insulation.

#### ELASTIC CORD

This elastic cord seals from the outside environment when the snow is deep and the weather is foul. The cuff goes completely over your jacket sleeve and cinch's tight with the cord.

#### LONG CUFF

Long gauntlet-style glove offers higher insulation and seals out the cold very effectively thanks to a draw cord.

#### REINFORCED LEATHER PALM

Abrasion-resistant goat leather patches on palm and thumb finger for both stretch and durability.

 THERMOPLUS is LEVEL's certification and guarantee for outstanding insulation and heat retention of the natural warmth of the hands.

**THE PERFECT FIT**  
 By creating gloves in half sizes, LEVEL delivers the perfect fit and ensures correct insulation that leads to warm hands and happy days on snow!

**PULLER**  
 A wider puller inserted in underside of cuff helps to properly wear the glove/mitten

**WATERPROOF FABRIC TREATMENT**  
 The fabric is laminated with a process that permits to add a breathable waterproof membrane to the outer material, optimizing warmth and comfort while keeping the hands dry.

## » CATEGORY HIGHLIGHTS

Built from the professional with features that can withstand everyday abuse in extreme weather, our Outdoor gloves & Mitts are designed for ultimate durability and high-end functionality.

## » TARGET CONSUMER

Designed for mountain lovers, from alpine climbers to ski mountaineers and snowshoeing enthusiasts, looking for insulation, dexterity and comfort.

# MOUNTAIN LIGHT

Outdoor gloves for hiking, alpine ski touring, and other outdoor adventures. Perfect gloves that withstand tough abuse and are made from our best materials.

# SKI ALPER

CODE: 3485UG | SIZE: XS / XXL

**DESCRIPTION:** Technical windbreaker and I-Touch glove. Ideal for spring skiing or wintertime activities that require high dexterity, the LEVEL Ski Alper Glove features pre-curved finger construction for a natural fit and feel.

**WARMTH INDEX:** 2000 - Standard

**FIT:** Slim **MATERIAL:** Wind breaker fabric, Waterproof goat leather palm **INSULATION:** Polartec® Alpha, Merino Wool-Polypropylene lining **DRY TECHNOLOGY:** Partial wind breaker **HIGHLIGHTS:** I-Touch system **FEATURES:** Short cuff, Wind&rain-cover pocket, Watch window, Safety leash

01 black

**POLARTEC® ALPHA®**  
Alpha® active insulation is engineered for consistent warmth, while allowing greater breathability during activity. This air exchange technology creates sustained comfort without shedding layers, which isn't an option during a mission.

**WIND&RAIN COVER**  
Created by LEVEL to improve wind and rain protection this technical feature is the perfect solution for temperature and weather changes

**I-TOUCH SYSTEM**  
The "I-Touch" system allows you to use your smart phone without having to remove the glove.

**WATCH PEEP HOLE**  
The watch slot on the cuff, which tucks around the face of your watch, allows you to check time without exposing any part of your wrist to cold air.

**SAFETY LEASH**  
This cord is used to secure the glove to your hand with an elastic strap. A big advantage when you don't want to wear gloves but want to keep them attached to the wrist.

**SPECIFIC PALM CUT**  
The improved palm-shape facilitates gripping ski poles and offers better sensibility

CODE: 3490UM | SIZE: XS / XXL

**DESCRIPTION:** Abrasion resistant foldable mitten with windbreaker fabric with I-Touch leather palm and water-resistant finish, ideal for alpine climbing, ski touring and snowshoeing.

**WARMTH INDEX:** 2000 - Standard

**FIT:** Natural **MATERIAL:** Wind breaker fabric, Waterproof goat leather palm **INSULATION:** Primaloft®, Hydrofill **DRY TECHNOLOGY:** Partial wind breaker

**HIGHLIGHTS:** I-Touch system **FEATURES:** Short cuff, Cabrio cover, Watch window, Safety leash

01 black

#### I-TOUCH SYSTEM

The "I-Touch" system allows you to use your smart phone without having to remove the glove.

#### MULTILAYER PRIMALOFT®

Soft insulation fabric. An insulation that is water repellent! Unlike down, it won't hold water so it even keeps you warm when it's wet! A warm and soft feeling that offers good breathability.

#### PRINTED PALM

A sleek icon pattern applied to the hood palm for an extra touch.

#### STOWABLE FLAP HOOD

The Windbreaker Trilaminat wind hood can be easily flipped off in mild weather. Perfect when fishing, hunting photographing, or ski touring.

#### WATERPROOF GOAT LEATHER

A soft waterproof leather, used mainly for ski gloves in areas which are exposed to high abrasion such as the palms or between the thumb and index finger.

#### SAFETY LEASH

This cord is used to secure the glove to your hand with an elastic strap. A big advantage when you don't want to wear gloves but want to keep them attached to the wrist.

# SEVENTIES

CODE: 2359UG | SIZE: XS / XXL

**DESCRIPTION:** Clean, fresh design. Optimal fit facilitated by 'easy on' leash on the cuff.

**WARMTH INDEX:** 2000 - Standard

**FIT:** Natural **MATERIAL:** Waterproof goat leather **INSULATION:** Fiberfill, Black fleece **DRY TECHNOLOGY:** Membra-Therm Plus **FEATURES:** Short cuff, Puller, Storm leash

05 beige

01 black

## MEMBRA-THERM PLUS

A highly breathable membrane insert that creates a waterproof barrier between exterior layer of the glove and the insulating materials. It optimizes warmth and comfort by keeping the hands dry.

## PULLER

A wider puller inserted in underside of cuff helps to properly wear the glove/mitten

## EMBOSSED DETAILS

A sleek LEVEL patch with embossed details for an extra touch.

## REINFORCED LEATHER PALM

Abrasion-resistant goat leather patches on palm and index finger for both stretch and durability.

# PRO RIDER MITT

CODE: 2361UM | CODE LOBSTER: 2361UT | SIZE: 6 (XXS) / 10 (XXL)

**DESCRIPTION:** A favorite of LEVEL's pro team, a super stylish pipe glove built to perform.

**WARMTH INDEX:** 2000 - Standard

**FIT:** Slim **MATERIAL:** Water resistant sublimated fabric, Silicone printed palm **INSULATION:** Fiberfill, Wind Breaker Lining **DRY TECHNOLOGY:** Wind Breaker

**FEATURES:** Short cuff, Sublimation on back & palm

**ASYMMETRICAL DESIGN**  
 Two different motifs are digitally printed on both shells for a trendy-inspired glove.

**WIND BREAKER LINING**  
 A thin fabric lining designed to resist wind chill and light rain. It is of lightweight construction and made of a synthetic material.

**ADJUSTABLE STRAP**  
 This closing system makes it easy to fit under jackets therefore offering a better closure.

**LEATHER OR SILICONE PALM**  
 Two different solutions. The silicone printed palm offers great grips and top performance while the leather one provides improved sensitivity and higher insulation.

## » CATEGORY HIGHLIGHTS

The Bliss collection was specifically designed by women for women. This Collection is an effort to marry fashion and warmth. Its Warmer, Drier, Softer, Ultra-breathable, Fashionable, and unimaginably comfortable. Several of the models come with a "Warmth Guarantee"

## » TARGET CONSUMER

Women of all ages looking for style and fashion even considering warmth and comfort the priority.

# WOMEN'S BLISS SIGNATURE

The Bliss line, specially designed by women for women who love snow. LEVEL used its first hand experience as well as input from a diverse group of female riders and skiers to develop a line of women's gloves and mitts unlike any other: warmer, dryer, softer, ultra-breathable, and unimaginably comfortable.

## MULTILAYER PRIMALOFT®

Soft insulation fabric. An insulation that is water repellent! Unlike down, it won't hold water so it even keeps you warm when it's wet! A warm and soft feeling that offers good breathability.

## CONSTRUCTION 3D

This is a special anatomical construction that permits a preformed shape. The preformed shape reduces wrinkles on the palm and guarantees better fit and sensitivity.

## COZY FUR

Stay warm and cosy. A thick fur cuff for optimum warmth and comfort. This model is ideal for adding a touch of glamour to your winter looks.

## CASHMERE LINING

Cashmere is usually indicated by an incredibly soft finish, which is a result of delicate fibres that are almost silky to the touch. This sought-after fabric is made in Italy using advanced technologies and is three times more insulating than sheep wool.

CODE: 3265WM | SIZE: 6 (XXS) / 8,5 (M-L)

**DESCRIPTION:** A mitt with super soft leather which is elegant and sporty at the same time, with Primaloft® padding and membrane: what could you want more?

**WARMTH INDEX:** 3000 - Warm

**FIT:** Natural **MATERIAL:** Water resistant sheep leather, Water resistant fabric **INSULATION:** Multilayer Primaloft®, Soft-touch lining with Polygiene treatment

**DRY TECHNOLOGY:** Membra-Therm Plus **FEATURES:** Fur cuff, Zipped cuff

01 black

**MULTILAYER PRIMALOFT®**  
 Soft insulation fabric. An insulation that is water repellent! Unlike down, it won't hold water so it even keeps you warm when it's wet! A warm and soft feeling that offers good breathability.

**POLYGIENE®**  
 Polygiene® provides protection against body odors and more. Based on a silver salt solution. Sweat, heat and humidity is nourishment for bacteria and they will grow and die in ever-increasing numbers.

**MEMBRA-THERM PLUS**  
 A highly breathable membrane insert that creates a waterproof barrier between exterior layer of the glove and the insulating materials. It optimizes warmth and comfort by keeping the hands dry.

**COZY FUR**  
 Stay warm and cosy. A thick fur cuff for optimum warmth and comfort. This model is ideal for adding a touch of glamour to your winter looks.

## MULTILAYER PRIMALOFT®

Soft insulation fabric. An insulation that is water repellent! Unlike down, it won't hold water so it even keeps you warm when it's wet! A warm and soft feeling that offers good breathability.

## CASHMERE LINING

Cashmere is usually indicated by an incredibly soft finish, which is a result of delicate fibres that are almost silky to the touch. This sought-after fabric is made in Italy using advanced technologies and is three times more insulating than sheep wool.

## MEMBRA-THERM PLUS

A highly breathable membrane insert that creates a waterproof barrier between exterior layer of the glove and the insulating materials. It optimizes warmth and comfort by keeping the hands dry.

## POWDER CUFF

This nylon cuff has a convenient adjustment for the closure around the wrist preventing snow from getting inside when riding powder.

**MEMBRA-THERM PLUS**  
 A highly breathable membrane insert that creates a waterproof barrier between exterior layer of the glove and the insulating materials. It optimizes warmth and comfort by keeping the hands dry.

**GOOSE DOWN**  
 High-fill power goose down represents the highest quality down commercially available. The down is isolated in small chambers so there is no fill migration; this ensures goose down even distribution and a great insulation performance.

**REINFORCED LEATHER PALM**  
 Abrasion-resistant goat leather patches on palm and index finger for both stretch and durability.

**PREFORMED FINGERS**  
 This is a special anatomical construction that permits a preformed shape. The preformed shape reduces wrinkles on the palm and guarantees better fit and sensitivity.

# BIOMEX WRIST PROTECTION

## CONTROL BOARD - TÜV SÜD PRODUCT SERVICE GMBH

It's all about pushing the limits. LEVEL gloves with Biomex wrist protection can help you stay in one piece...So you'll be riding tomorrow instead of seeing the doctor. LEVEL's proven Biomex wrist protection system is the result of an extensive and on-going collaboration between snowboarders, the medical community, and engineers who understand bio-mechanics. Biomex research and development is based at the Klinik Gut, center of bone and joint surgery in St.Moritz, Switzerland, where LEVEL pros and physicians design and develop the most advanced wrist support technology on the market - the Biomex Plus. For beginners, the most frequent cause of a wrist fracture in snowboarding is a backwards fall. For more experienced riders it's a front and sideways fall. There are many wrist guards on the market, but based on their design, they don't all deliver the same degree of safety performance.

### SNOWBOARD PROTECTION

SINGLE DENSITY MATERIAL + PAD

SINGLE DENSITY MATERIAL

NEW ERGONOMIC SHAPE FOR BETTER COMFORT AND EASE OF MOVEMENT

THE BIOMEX SYSTEM CAN BE USED WITH OR WITHOUT REMOVABLE LINING THANKS TO ITS SELF ADJUSTMENT MESH FOUND ON ALL VERSIONS.

### SPECIFIC WOMEN'S FIT

Snowboard protection specifically designed for women's hands for improved fit and comfort

### FREESKI BIOMEX EVOLUTION

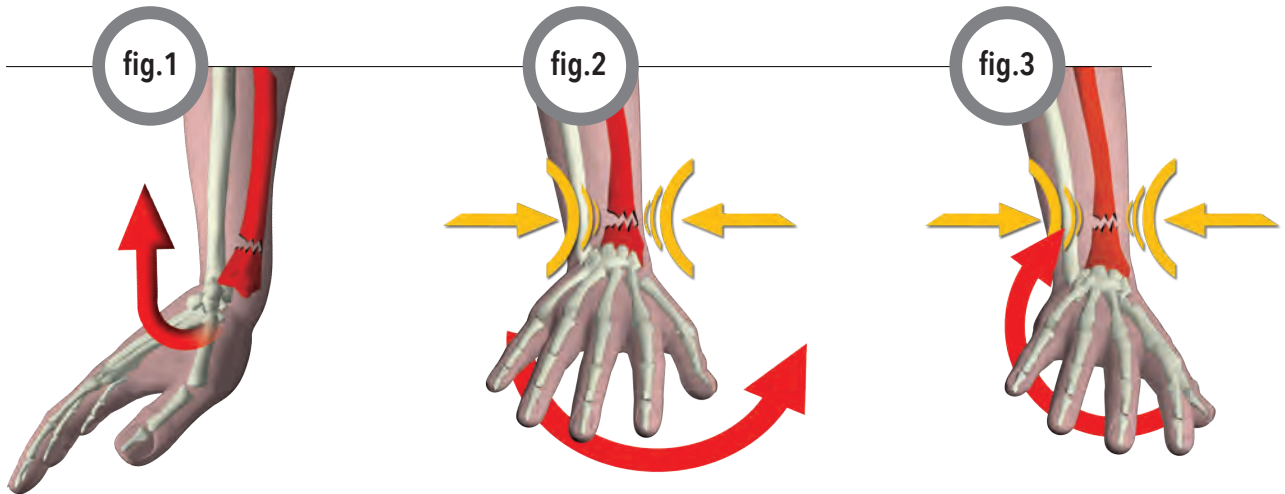

Specific designed for skiers, shorter and harder material, it is attached to the lining and fits anatomically to the hand.

## HOW DO YOU GET HURT?

During a fall your wrist is put in hyper extension (fig.1) (The back of hand is pushed towards the forearm). In addition to this hyper extension, the wrist often experiences two types of twisting forces technically referred to as pronation (fig.2) and radial adduction (fig.3).

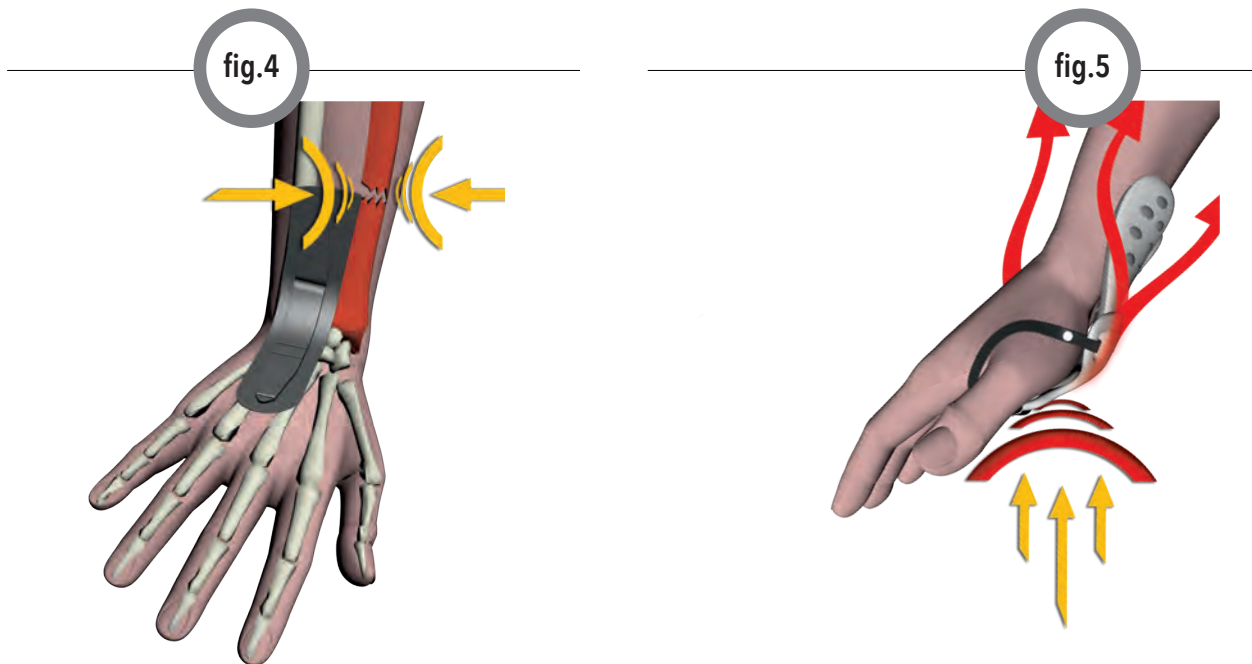

It's the combination of these three forces that most often causes a wrist injury such as a wrist fracture.

## WHY IS BIOMEX A BETTER WRIST GUARD?

Most wrist guard systems deal with hyper-extension alone, but the Biomex system addresses all three of the forces that contribute to wrist injury. Standard wrist guards frequently push the fracture further up the forearm (fig.4).

Biomex (fig.5) is the only wrist guard that keeps the wrist in an anatomically strong position, where muscle forces and bone congruency combine to provide optimum stability without compromising the freedom to move.

# SUPER PIPE GTX

CODE: 1004UG | SIZE: 7 (S) / 10 (XXL)

**DESCRIPTION:** Top of the range snowboard glove with incorporated protection. With GORE-TEX and innovative 'easy slide' palm.

**WARMTH INDEX:** 4000 - Very Warm

**FIT:** Relaxed **MATERIAL:** Superfabric, Kevlar reinforcement **INSULATION:** Knitted Brush **DRY TECHNOLOGY:** GORE-TEX **HIGHLIGHTS:** BIOMEX Protection + Pad, Shock Absorber on palm **FEATURES:** Long cuff, Adjustable strap, Powder cuff, Storm leash, Boa & Fleece removable lining, Breathable system

01 black

## GORE-TEX INSIDE

If you want to spend the whole day out, you want to avoid numb fingers. Even in harsh, cold conditions the whole system of inner lining, membrane and outer material is optimized to keep your hands warmer for longer.

## BIOMEX® PROTECTION + PAD

New ergonomic shape for better comfort and ease of movement. The BIOMEX SYSTEM can be used with or without removable lining thanks to its self adjustment mesh found on all versions.

## SUPERFABRIC®

SuperFabric® is a material that's longer lasting, has higher durability, and is designed for everything from extreme applications to rugged daily usage.

## GOGGLE & NOSE CLEANER

The mini goggle squeegees helps to easy-clean your lenses. The special velvet fabric on the thumb provides a soft place to wipe your runny nose.

## FLEX PALM

The elastic cordura insert on the palm allows for a better fit, more flexibility and a cozy feeling.

## BREATHABLE SYSTEM

An air exchanging vent is placed on the back of the glove allowing moisture to escape. This improves the drying time of the glove and avoids hands getting wet.

## THUMB PROTECTION SYSTEM

In skiing they are reported to be the second most frequent injury after the knee. In detail thumb injuries are reported to make up between 5% - 20% of all injuries in Alpine skiing and are sustained by approximately 80,000-240,000 patients per year world wide.

The Ski Thumb is an injury affecting the ulnar collateral ligament (UCL) at the metacarpophalangeal joint of the thumb. The mechanism is due to the forces which are applied when a skier falls with the pole in his/her hand.

The handle of the pole will act as a fulcrum applying forces across the joint and thereby putting the ligament under strain. The skier hits the surface with high velocity (high energy trauma). If the hand is stretched out as a natural reflex, there is a significant chance that the thumb will be forced outwards resulting in a fracture of the UCL.
